

Educational Adequacy Report

The School Funding Reform Act of 2008 (SFRA) requires that the Governor issue an Educational Adequacy Report (EAR) to the Legislature every three years, with recommendations for updating certain elements included in the formula. This document marks the fourth cycle of the Governor's recommendations according to the statutory requirement contained in N.J.S.A. 18A:7F-46(b).

According to the statute, the EAR must include updates pertaining to the following seven major components of the funding formula:

1. the base per pupil amount based upon the core curriculum content standards established pursuant to N.J.S.A. 18A:7F-46(a);
2. the per pupil amount for full-day preschool;
3. the weights for grade level, county vocational districts, at-risk pupils, bilingual pupils, and combination (at-risk and bilingual) pupils;
4. the cost coefficients for security aid and transportation aid;
5. the state average classification rate for general special education services pupils and for speech-only pupils;
6. the excess cost for general special education services pupils and for speech-only pupils; and
7. the extraordinary special education aid thresholds.

Much of the basis for the weights set forth in the SFRA comes from a comprehensive school district model informed by input from panels of experts and practitioners. In assessing the components of the SFRA, the New Jersey Department of Education (Department) updated the resources used in that model, along with the figures for the components listed above. In accordance with the SFRA, the following provides the three-year update to major components of the funding formula and will hereinafter be referred to as the FY2023 EAR.

School Funding Reform Act Update

1. Base Per Pupil Amount

The “base” per pupil amount was initially determined through results of Professional Judgment Panels (PJPs), which were convened to form the foundation of the funding formula, and subsequent advisory panels. All of the additional weights (grade level, at-risk, and bilingual) are applied to the base amount. Using the resources and staffing levels from the original model, the Department updated costs to develop the current base per pupil amount. The updates include changes to average salaries, employee benefits, and the application of the consumer price index (CPI)¹ to costs in the model.

To revise salaries, the Department used data from two sources, depending on the type of employee. The first source is Certificated Staff Data, which is reported by districts and includes detailed information for all certificated district employees. Data includes salary amounts for each job code, full-time equivalency (full-time, half-time, etc.), and area of certification. For positions included in the certificated staff data collection, the Department calculated the average (mean) salary using actual reported salaries for all full-time staff employed during FY2021 for each job code included in the staffing resources identified by the panelists and subsequent advisory groups. The salaries for non-certificated positions were found using the [May 2020 State Occupational Employment and Wage Estimates for New Jersey](#) from the Bureau of Labor Statistics (BLS). Average salaries for all personnel were adjusted using the CPI to standardize them at a projected FY2023 level.

Consistent with the original SFRA recommendations and the previous update for FY2020, health benefit costs were added to salaries for each personnel type. Health benefits were calculated using the average cost for participating in the School Employees’ Health Benefits Program (SEHBP) in 2021, the latest available year. After inflating the average cost of health benefits for FY2021 to a projection for FY2023 using two years of the CPI, the average was prorated to account for the proportion of employees who waive health coverage. The most recent data from the NJ Division of Pensions and Benefits shows approximately 12% of active local education employees waive coverage with no alternative compensation for the waiver. Since this reduces the healthcare benefit costs for districts, the average cost was prorated to 88%. The final average healthcare benefit cost applied in the model for the FY2023 EAR is \$21,726.

In applying the average health benefits cost to the model, the FY2017 EAR and FY2020 EAR both included modifications to account for employee contributions required by P.L. 2011, Chapter 78. That law required employees to contribute a specified portion of their health costs in an amount ranging from a minimum of 1.5% of salary up to 35% of the health care

¹ The CPI applied for all calculations, except utilities, is the combined New York and Philadelphia Urban Consumers index (CPI-U), as calculated by the New Jersey Department of Treasury. The rates applied for each fiscal year are shown in Appendix A.

premium, where the contribution rate varied by type of plan, premium cost, and the individual's salary level. In applying the medical benefits costs for the FY2023 EAR, the Department used the same assumptions as in previous iterations with one additional adjustment for the implementation of P.L. 2020, Chapter 44. While Chapter 78 generally required employees to contribute a percentage of the health premium cost, Chapter 44 allows educators who choose the new Educators Health Plan to contribute a percentage of their salary rather than a percentage of the premium.² To account for this variation, the Department applied to each staff position the weighted average of the contribution amounts using both methods (percent of premium and percent of salary).³

Other employee benefits were determined using the latest actual rates (for FY2021). The Department applied a workers' compensation rate of 10.86% for maintenance staff and a rate of 1.43% of salary for all other personnel, both of which were derived from the [New Jersey Rate & Classification Handbooks](#). For non-certificated personnel, the Department applied a Public Employees' Retirement System (PERS) rate of 15.768%⁴ of salary and a Federal Insurance Contributions Act (FICA) rate of 7.65%⁵ of salary, which were found on the [Actuarial Valuation Report for the Public Employees' Retirement System of New Jersey](#) and a [Social Security Administration Fact Sheet](#), respectively. Since the State pays each district's share of pension and FICA costs for certificated staff, these costs were not added to the benefit assumptions for certificated staff positions. Total salary and benefits costs for each personnel resource can be found in Appendix B.

The PJP model that generates the base per pupil amount (as well as additional costs) includes several cost components in addition to personnel. Some examples are: school-level resources such as supplies, professional development, and technology; and district-level resources such as security, utilities, and textbooks. Most of the non-personnel cost components were derived from panelists' estimates on a per-school, per-teacher, or per-student basis. In order to update the costs, the Department used the original PJP dollar amounts, which correspond to FY2006, and inflated the amounts for each year using the CPI⁶ to project FY2023 costs.

² In applying the contribution rates to the model, the Department used the family coverage contribution rate for the percentage of the premium and the single coverage contribution rate for the percentage of salary. These will yield lower employee contributions and higher school district costs. Contribution rates by type of coverage (family, single, or parent/child) are available on the New Jersey Department of the Treasury's webpage for [health benefits information for active employees](#).

³ The averages are weighted by the share of employees enrolled in each plan type according to participation rate data provided by the NJ Department of the Treasury.

⁴ The anticipated rate for 2022 is 15.768%, as shown in Table V-7 on page 75 of the report.

⁵ The FICA rate is 7.65% of salary up to \$142,800. None of the non-certificated staff salaries exceed this threshold. These are the anticipated rates for FY2021 according to current Federal law.

⁶ Utilities costs are inflated using the CPI-Energy, calculated using both New York and Philadelphia in the same manner used for the CPI-U calculation.

The historical base per pupil amounts are shown in Table 1, along with the actual base amount applied for FY2022 state aid calculations and the recommendation based on the latest update. The recommendation in the FY2023 EAR will grow the base cost by \$274 per student, an increase of 2.3% increase from FY22 state aid and a 5.74% increase compared with the FY2020 EAR.

Table 1 Base Per Pupil Amounts

| Fiscal Year | Base Amount (Elementary) |
|------------------------------|---------------------------------|
| FY2009 (SFRA) | \$9,649 |
| FY2014 EAR Recommendation | \$11,009 |
| FY2017 EAR Recommendation | \$11,009 |
| FY2020 EAR Recommendation | \$11,775 |
| FY2022 State Aid Calculation | \$12,177 |
| FY2023 EAR Recommendation | \$12,451 |

2. Preschool Per Pupil Amount

The foundation for preschool education aid (PEA) in the SFRA was initially determined using budgeted expenditures from districts that were already running high quality full-day preschool programs. The Department compiled district data to determine the average cost per pupil based on the type of school site. While this methodology has been highly regarded, the current method of funding does not allow for an update using the same process. Since the State provides 100% of preschool costs and districts spend the aid they receive, a calculation of expenditures will yield the current aid amount.

For the FY2023 EAR update, the Department reviewed current literature regarding preschool expenditures. The National Institute for Early Education Research (NIEER) publishes an annual report describing the status of preschool education across our nation.⁷ According to the latest edition of the publication “The State of Preschool 2020,” the national average of state spending per child enrolled in preschool was only \$5,499 in 2020. By comparison, New Jersey ranked 2nd highest in fiscal support for preschool, reporting \$14,103 per child enrolled in preschool. Based on our observations of district expenditure and the literature on preschool costs, it is our recommendation that the Department continue to increase the preschool funding amounts according to inflation. The table below shows the historic funding amounts, along with the recommendation for FY2023 (the FY2020 amounts inflated by three years).

⁷ NIEER’s 2020 State Profile and other reports can be found on their [State of Preschool Yearbooks webpage](#).

Table 2 Preschool Per Pupil Amounts, by Provider

| Fiscal Year | In District | Private Provider | Head Start |
|--------------------|--------------------|-------------------------|-------------------|
| FY2009 (SFRA) | \$11,506 | \$12,934 | \$7,146 |
| FY2014 EAR | \$12,788 | \$14,375 | \$7,943 |
| FY2017 EAR | \$12,788 | \$14,375 | \$7,943 |
| FY2020 EAR | \$13,209 | \$14,848 | \$8,204 |
| FY2023 EAR | \$13,922 | \$15,648 | \$8,646 |

3. Weights for Grade Level, County Vocational School Districts, At-Risk Pupils, Bilingual Pupils, and Combination Pupils

The SFRA calculations account for the additional resources and services necessary for students with greater needs by assigning different weights to be applied to the costs for these students. The weighted enrollment, accounting for all such factors, is applied to the base cost (*see* Base Per Pupil Amount section). The additional weights are provided for each student who meets the criteria for the following five categories: (1) grade level; (2) county vocational school districts; (3) at-risk students (income-eligible for free or reduced price lunch); (4) bilingual or Limited English Proficient students; and (5) students who are both at-risk and bilingual (referred to as “combination students”).

Grade Level Weight

Updates to the cost components, as outlined in the previous Base Per Pupil Amount section, generate costs per pupil for students at the elementary, middle, and high school levels. As defined in the SFRA, the elementary weight applies to students in kindergarten⁸ through grade five, the middle school weight applies to students in grades six through eight, and the high school weight applies to students in grades nine through 12. While the base cost has fluctuated since the first year of SFRA (FY2009), the costs for middle and high school have increased proportionately. That is, the recommended weights for middle school students has remained constant since FY2009 (1.04) and the recommended high school weight is only slightly lower – now 1.15 compared with 1.17 in the initial year of the funding formula. This change reflects marginal shifts in the calculations employed when determining costs based on the established model school district. The historical and recommended weights are shown in Table 3A.

⁸ For half-day kindergarten students, the SFRA applies a 0.5 weight to the base per pupil amount. Students classified as “preschool disabled” are included in the elementary enrollment.

Table 3A Grade Level Weights

| Fiscal Year | Elementary Base | Weight applied to base for Middle School students | Weight applied to base for High School students |
|--------------------|------------------------|--|--|
| FY2009 (SFRA) | 1.00 | 1.04 | 1.17 |
| FY2014 EAR | 1.00 | 1.04 | 1.16 |
| FY2017 EAR | 1.00 | 1.04 | 1.16 |
| FY2020 EAR | 1.00 | 1.04 | 1.16 |
| FY2023 EAR | 1.00 | 1.04 | 1.15 |

County Vocational School District Weight

The SFRA also included an additional weight for students attending county vocational school districts. Consistent with previous iterations, the calculation for the county vocational weight compares actual costs for general education in county vocational districts with high school costs from the model. This method estimates the portion of actual expenditures that county vocational districts used for general education by excluding costs for special education, at-risk, and bilingual programs. The FY2020 audited expenditure data for county vocational districts was used to estimate the general education cost, which was then inflated for three years of CPI to yield a FY2023 per pupil cost of \$18,209. When compared with the FY2023 high school cost of \$14,313, the results show county vocational districts spend, on average, 27% more per pupil than the model would suggest for a traditional high school student. Thus, for county vocational students, both the high school weight and the county vocational weight are applied. The FY2023 recommendation and historical weights are shown in Table 3B. The increase from the FY2020 EAR is largely the result of the application of inflation rates, which are the highest they have been in nearly ten years.

Table 3B County Vocational Weights

| Fiscal Year | Additional Weight for County Vocational students |
|--------------------|---|
| FY2009 (SFRA) | 0.31 |
| FY2014 EAR | 0.26 |
| FY2017 EAR | 0.25 |
| FY2020 EAR | 0.22 |
| FY2023 EAR | 0.27 |

At-Risk Weight

The SFRA specifies at-risk weights, including a sliding scale based on each district’s concentration of at-risk students, which exceed those derived from the PJP model. The PJP participants identified costs required to provide programs and services for at-risk students at

various concentration thresholds. In FY2009, the PJP-derived weights ranged from 0.42 to 0.46. However, subsequent expert panels recommended higher weights should be applied in the formula (weights of 0.47 – 0.57 were used).

In this FY2023 EAR update, the additional resources specified for at-risk students in the model yield weights that range from 0.41 to 0.46, similar to the weights resulting from the original PJP process and those proposed in the FY2014 and FY2017 EAR recommendations. However, by concurrent resolution, the Legislature rejected the lower at-risk weights suggested in both reports.

As a result, the Department is recommending no change to the current at-risk weights of 0.47 to 0.57, where the lower weight (0.47) applies to districts with at-risk rates of 20% and below, and the higher weight (0.57) applies to districts with at-risk rates of 60% and above. For those districts falling between 20% and 60% at-risk concentrations, the sliding scale described in the SFRA will be applied from 0.47 to 0.57. The history of the weights proposed in previous reports, along with the FY2023 EAR recommendations, are reflected in Table 3C.

Table 3C At-risk Weight Recommendations by Low-Income Concentration

| Fiscal Year | At-risk weight where low-income < or = 20% | At-risk weight where low-income rate = 40% | At-risk weight where low-income > or = 60% |
|--------------------|--|---|--|
| FY2009 (SFRA) | 0.47 | 0.52 | 0.57 |
| FY2014 EAR | 0.42 | 0.46 | 0.46 |
| FY2017 EAR | 0.41 | 0.46 | 0.46 |
| FY2020 EAR | 0.47 | 0.52 | 0.57 |
| FY2023 EAR | 0.47 | 0.52 | 0.57 |

LEP Weight for English Language Learners

The SFRA specified an LEP (Limited English Proficient) weight of 0.50 for students eligible for programs for English Language Learners. Like the at-risk weights, the LEP weight derived from the PJPs was lower than the weight codified in the SFRA for FY2009 – 0.47 compared with 0.50, respectively. Updating the PJP cost components using the latest available salary data and CPI increases again resulted in a lower weight (0.45), which was the same weight proposed in the FY2017 EAR. Since the Legislature also rejected the lower weights for LEP costs that were suggested in the previous EAR recommendations, the FY2023 EAR recommendation is to maintain the current weight of 0.5, as shown in Table 3D.

Table 3D Bilingual Weights

| Fiscal Year | Additional Weight for Bilingual/LEP students |
|--------------------|---|
| FY2009 (SFRA) | 0.50 |
| FY2014 EAR | 0.46 |
| FY2017 EAR | 0.47 |
| FY2020 EAR | 0.50 |
| FY2023 EAR | 0.50 |

Weight for Students who are both At-risk and LEP (Combination Weight)

In the SFRA, students reported as both at-risk and LEP (English Language Learners) receive the district’s at-risk weight plus what is called the combination weight. Since there is some overlap in the resources described by the PJPs for at-risk-only students and bilingual-only students, the combination weight reflects only those resources in excess of the ones specified for at-risk-only students. As described above and utilizing the data from the PJP deliberative process, the cost components related to students with these characteristics were updated to reflect current costs. The updates show that the non-duplicated costs make up 21.11% of the total cost for LEP students, suggesting a combination weight of 0.095. However, consistent with the decision to maintain SFRA weights for at-risk and LEP, the Department is recommending that the weight for combination students remain at 0.1250 (plus the district’s at-risk weight). The historical weights and recommendation for FY2023 are reflected in Table 3E.

Table 3E Combination Weights

| Fiscal Year | Additional Weight for Bilingual/LEP students who also receive the At-risk weight |
|--------------------|---|
| FY2009 (SFRA) | 0.1250 |
| FY2014 EAR | 0.0981 |
| FY2017 EAR | 0.0990 |
| FY2020 EAR | 0.1250 |
| FY2023 EAR | 0.1250 |

4. Cost Coefficients for Security Aid and Transportation Aid

Security Aid

The SFRA created a two-component security aid calculation. The first component is a per pupil security amount that applies to every student in the district. The second component is an additional amount that applies only to at-risk students. The at-risk security amount per pupil varies according to a sliding scale that increases as the district’s at-risk concentration

increases, capping at concentrations of 40% and above. Because the security cost factors (per pupil amounts) are based on the resources specified in the PJP model, the amounts were updated for actual salaries, benefits, and CPI adjustments as described in previous sections. Security costs shown in the resource model are highlighted in yellow in Appendix B because they are provided as a separate categorical aid rather than being included in the base cost for Equalization Aid.

Table 4A Security Per Pupil Amounts

| Fiscal Year | Security for All students | Additional Security for At-risk |
|--------------------|----------------------------------|--|
| FY2009 (SFRA) | \$70 | \$406 |
| FY2014 EAR | \$75 | \$428 |
| FY2017 EAR | \$77 | \$452 |
| FY2020 EAR | \$83 | \$495 |
| FY2023 EAR | \$86 | \$519 |

Transportation Aid

Transportation aid also involves two calculations in that there is one calculation for general transportation services and a separate calculation for special transportation services that are provided according to students’ Individualized Educational Plans. The formula applies to the student counts a base per pupil amount and a per mile amount for either regular or special transportation.

The calculation of the transportation costs for base per pupil and per mile amounts were not included in the original PJP process. Therefore, each EAR update inflates the cost factors by increases in CPI. Table 4B shows the historical amounts and current recommendations.

Table 4B Transportation Aid Components

| Fiscal Year | Regular per Pupil Base Amount | Regular Average per Mile | Special per Pupil Base Amount | Special Average per Mile |
|--------------------|--------------------------------------|---------------------------------|--------------------------------------|---------------------------------|
| FY2009 (SFRA) | \$383.88 | \$10.50 | \$2,675.77 | \$5.10 |
| FY2014 EAR | \$426.65 | \$11.67 | \$2,973.90 | \$5.67 |
| FY2017 EAR | \$442.18 | \$12.10 | \$3,082.15 | \$5.88 |
| FY2020 EAR | \$456.74 | \$12.50 | \$3,183.58 | \$6.08 |
| FY2023 EAR | \$481.37 | \$13.17 | \$3,355.31 | \$6.40 |

5. State Average Classification Rate for General Special Education Services Pupils and for Speech-only Pupils

The special education and speech-only components of the SFRA are census-based formulas. These formulas use the statewide average classification rates of general special education and students classified for only speech services, multiplied by the district’s total resident enrollment, then multiplied by the excess cost for the respective classification (detailed in Section 6 below). For FY2023, the Department used October 2020 enrollments submitted to the Application for State School Aid (ASSA) data collection to determine the statewide average classification rates. This data is the most recent completed, and audited, enrollment data available. The current average classification rate from October of 2020 for special education services is 15.90% (up slightly from 15.40% used in the FY2020 EAR), and the Statewide average classification rate for speech-only is 1.61% (up from 1.57% used in the FY2020 EAR). Table 5 shows the classification rates for each report since FY2009.

Table 5 Special Education and Speech Classification Rates

| Fiscal Year | Average Classification Rate for Special Education | Average Classification Rate for Speech only |
|--------------------|--|--|
| FY2009 (SFRA) | 14.69% | 1.90% |
| FY2014 EAR | 14.78% | 1.72% |
| FY2017 EAR | 14.92% | 1.63% |
| FY2020 EAR | 15.40% | 1.57% |
| FY2023 EAR | 15.90% | 1.61% |

6. The Excess Cost for General Special Education Services and for Speech-only

The excess cost for general special education is determined using actual expenditures for special education services from the FY2020 Audit Summary, the most recent data available, and inflating by CPI to project costs for FY2023. Inclusive of all pertinent costs, such as districtwide and mainstreaming costs in addition to special education specific costs, the Department determined the total average expenditure for special education for FY2023 to be \$32,674 per (classified) pupil. Subtracting the weighted average base cost of \$13,150 yields a per pupil excess cost for general special education services of \$19,524 for FY2023.

In contrast to the excess cost for general special education, the excess cost calculation for speech-only is based upon the resources outlined by the PJP model for “mild”⁹ classification services. The cost components identified in the model were updated using CPI increases and actual salaries as described above and resulted in a per pupil speech-only cost of \$1,270 for FY2023. The special education and speech-only per pupil amounts are shown in Table 6.

⁹ The “mild” classification category as used during the PJP process was defined as speech-only.

Table 6 Special Education and Speech Per-Pupil Amounts

| Fiscal Year | Excess Cost for Special Education students | Excess Cost for Speech-only students |
|--------------------|---|---|
| FY2009 (SFRA) | \$10,897 | \$1,082 |
| FY2014 EAR | \$15,337 | \$1,221 |
| FY2017 EAR | \$17,034 | \$1,159 |
| FY2020 EAR | \$18,612 | \$1,220 |
| FY2023 EAR | \$19,524 | \$1,270 |

7. Extraordinary Special Education Aid Thresholds

Extraordinary special education aid is intended to provide financial assistance to districts for special education services that cost significantly more than general education services. Unlike most other aid categories, extraordinary aid is provided as a reimbursement for a portion of districts’ actual eligible costs that exceed a given threshold. The thresholds that define “extraordinary” costs were first determined with the enactment of the SFRA..

Unlike other cost estimates in the formula, these thresholds were never indexed for inflation. To ensure this aid category would continue to identify students with the greatest needs, the Department’s FY2014 EAR included a recommendation to increase the thresholds for each placement type by \$5,000. However, the higher thresholds were rejected by the Legislature’s concurrent resolution and were never applied.

Table 7A shows that in the first year of SFRA approximately 4.4% percent of those students who were classified for special education required services that met the cost threshold for extraordinary aid reimbursement. By FY2020, the percentage nearly doubled, growing to 8.2%. The table also shows how the Average Cost for Special Education Services has increased by 67% during the course of the SFRA.

Table 7A Extraordinary Aid Analysis

| Fiscal Year | Public Threshold | Private Threshold | Average Cost Special Ed Services | Classification Rate (All Special Ed) | % Special Ed Eligible for ExAid |
|--------------------|-------------------------|--------------------------|---|---|--|
| FY2009 (SFRA) | \$40,000 | \$55,000 | \$19,519 | 14.7% | 4.4% |
| FY2014 EAR | \$40,000 | \$55,000 | \$25,007 | 14.8% | 6.4% |
| FY2017 EAR | \$40,000 | \$55,000 | \$28,681 | 14.9% | 7.4% |
| FY2020 EAR | \$40,000 | \$55,000 | \$31,076 | 15.4% | 8.2% |
| FY2023 EAR | \$40,000 | \$55,000 | \$32,674 | 15.9% | |

| Fiscal Year | Public Threshold | Private Threshold | Average Cost Special Ed Services | Classification Rate (All Special Ed) | % Special Ed Eligible for ExAid |
|----------------------|-------------------------|--------------------------|---|---|--|
| Change from FY09 | \$0 | \$0 | \$13,155 | 1.2% | 3.8% |
| Pct Change from FY09 | 0.0% | 0.0% | 67.4% | 8.2% | 87.0% |

It is also important to consider the impact of maintaining a static threshold while out of district (or private provider) tuition rates are increasing. In FY2009 the majority (70%) of [Approved Private Schools for Students with Disabilities](#) (APSSDs) had tuition rates that fell below the \$55,000 threshold for private placements and the median tuition rate for APSSDs was \$48,190. This compares to FY2020, when the median certified tuition rate was \$71,351, and 12 APSSDs (9%) had baseline tuition rates¹⁰ below the \$55,000 threshold.

While the Department recommends no change to the thresholds for FY 2023, it will continue to monitor the cost changes discussed above for special education services. Although the underlying costs for special education have increased appreciably since these thresholds were first enacted, holding the thresholds constant allows for additional state support to districts as a greater proportion of special education student qualify for extraordinary aid. An increase to these thresholds would reduce state support for high needs students by making fewer students eligible for this supplemental funding. The recommended thresholds from each EAR are shown in Table 7B.

Table 7B Extraordinary Aid Thresholds

| Fiscal Year | In-District Placement (90% funded) | Public Separate Placement (75% funded) | Private Placement (75% funded) |
|--------------------|---|---|---------------------------------------|
| FY2009 (SFRA) | \$40,000 | \$40,000 | \$55,000 |
| FY2014 EAR | \$45,000 | \$45,000 | \$60,000 |
| FY2017 EAR | \$40,000 | \$40,000 | \$55,000 |
| FY2020 EAR | \$40,000 | \$40,000 | \$55,000 |
| FY2023 EAR | \$40,000 | \$40,000 | \$55,000 |

¹⁰ APSSD certified tuition rates do not include additional fees for services necessary to meet individual student needs that are outside the baseline tuition cost applied to all students.

Appendix A - Changes in the New Jersey Consumer Price Index 2007-2021

Note:

- The New Jersey CPI (Column 2) is the combined New York and Philadelphia Urban Consumers index (CPI-U), as calculated by the New Jersey Department of Treasury.
- CPI is calculated using data from July of the previous year to June of the year identified (column 1).

| Year | New Jersey CPI | New Jersey Energy CPI |
|-------------|-----------------------|------------------------------|
| 2007 | 2.89% | 3.61% |
| 2008 | 3.34% | 12.58% |
| 2009 | 1.60% | -6.08% |
| 2010 | 1.23% | -1.01% |

Overlapping Resources for LEP Students
(Duplicated Resources* are highlighted)

Note: The more accessible versions of these tables are found in the "LEP Weight" sheets in the Appendix B Excel file.

*In determining the number of resources that were duplicated, the DOE compared the LEP resources with those specified for the moderate at-risk concentration. LEP teachers were assumed to overlap with reading specialists (for at-risk).

Elementary (28 students per school, 6 schools)

| | Resources | Unit Cost | Total Cost | Total Duplicated | Non-Duplicated |
|---------------------------------|-----------|-----------|------------|------------------|----------------|
| Teachers | 1.1 | 97,678 | 107,446 | 107,446 | |
