Guidance for Reporting Student Absences and Calculating Chronic Absenteeism

Version 2: May 2018
In order for students to learn and achieve their fullest potential, it is critical that they are in school and engaged in the learning process. Research shows that student absences impact a child’s ability to succeed in school. In addition, research shows that chronic absenteeism from school is a primary cause of low academic achievement and a powerful predictor of a student’s risk of dropping out of school. 

With the Every Student Succeeds Act (ESSA), the latest reauthorization of the Elementary and Secondary Education Act on December 10, 2015, the New Jersey Department of Education has identified chronic absenteeism as its indicator of school quality and student success for accountability (see approved ESSA State Plan). Chronic absenteeism is factored into the summative rating used to identify schools in need of comprehensive and targeted support and improvement. Additionally, school-level chronic absenteeism is included in each district’s annual School Performance Reports for kindergarten through grade 12, per ESSA Sec.1111.

This guidance clarifies policies and expectations for reporting student membership and attendance data in NJ SMART and the methodology for measuring chronic absenteeism. Districts should review their locally-developed attendance data collection system or work with their Student Information System (SIS) vendors to make sure they are in compliance with attendance reporting requirements as outlined in this guidance.

With more accurate data on student attendance, schools and districts can use this information to better identify the root causes of chronic absence and implement improvement strategies to address these issues. A list of various research-based strategies for reducing chronic absenteeism is available on the NJDOE website.

Definitions

“Chronic Absenteeism” is defined in New Jersey’s ESSA State Plan as the percentage of a school’s students who are not present for 10 percent or more of the days that that they were “in membership” at a school.

“Cumulative Days in Membership” is an element in NJ SMART defined as the number of school days in session in which a student is enrolled/registered during the annual reporting period from July 1 through June 30. The count will commence the first day the student is expected to start, even if they do not actually attend that day.

❖ School Day in Session is a day on which the school is open and students are under the guidance and direction of a teacher(s); and the day must be 4 hours or more to be considered a full day (or at least 2½ hours for kindergarten) (N.J.A.C. 6A:32-8.3(a) and (b)).

The number of possible days in session for a student on home instruction is the same as for other students in the program in which the student is enrolled (N.J.A.C. 6A:32-8.1(f)).

- Schools must be in session a minimum of 180 days.
- The number of school days in session does not include summer school.
- The extended school year is included in the calculation up to June 30 and only when it is required for all students.

Five allowable reasons for absence: A school may have a day in session that would not be counted as a day in membership for a particular student for the following reasons (New Jersey School Register, Ch.3):

- Religious observance (N.J.A.C. 6A:32-8.3(h));
- A college visit (up to 3 days per school year, only for students in grades 11 and 12);
- “Take Our Children to Work Day” (pursuant to the memo issued by the Commissioner to all districts on April 25, 2017) or other rule issued by the Commissioner;
- Participation in observance of Veterans Day (N.J.S.A. 18A: 36-13.2) or district board of election membership activities (N.J.S.A. 18A: 36-33); or
- The closure of a busing district that prevents a student from having transportation to the receiving school.

“Cumulative Days Present” is an element in NJ SMART defined as the number of school days a student is present (not absent) when the school is in session during the annual reporting period (July 1 through June 30) and the student is recorded under the guidance and direction of a teacher in the teaching process (N.J.A.C. 6A:32-8.3). Whether a student absence is due to illness, disciplinary action, or other reason, the student may not be considered present at school unless home instruction is received. A student with an “excused” absence per district board of education policy can NEVER be considered as present.

- Time present – Full Day: For a school in session during morning and afternoon, the student must be present for at least one hour in the morning and at least one hour in the afternoon to be considered as present for a full day; for a school in session during either morning or afternoon, the student must be present at least two hours to be recorded as present for the full day (N.J.A.C. 6A:32-8.3(k)), for example, twilight programs. For a half day preschool or kindergarten session, the student must be present for at least one hour to be considered present for a full day.

- Time present – Half Day: A student must be present at least one hour during any morning, afternoon, or evening session to be recorded as present one-half day (New Jersey School Register, Ch.3).

Home instruction: A student receiving home instruction is considered present and in membership under the following circumstances:

- A student with a temporary or chronic health condition receives home instruction by a certified teacher for the number of days and length of time sufficient to continue the student’s academic progress. A student with a disability must receive home instruction consistent with the student’s individualized education program (N.J.A.C. 6A:16-10.1).
- A general education student, for reasons other than a temporary or chronic health condition, receives 10 or more hours of home instruction per week by a certified teacher.
on at least three separate days and no fewer than 10 hours per week additional guided-learning experiences (N.J.A.C. 6A:16-10.2).

- A student, when placed on home instruction through an IEP, receives 10 or more hours of instruction per week on at least three separate days by an appropriately certified teacher or teachers (N.J.A.C. 6A:14-4.8).

- NOTE: When instruction is provided for less than the minimum number of hours and/or days required per week, the student must not be recorded as present for more than four days when school was in session for a full five-day week. School districts are able to develop their own policy for determining the exact number of days to record the student present based on these circumstances.

- **School-sponsored education programs:** A student participating in a school-sponsored educational program under the guidance and direction of a teacher, pursuant to N.J.A.C. 6A:32-8.3, even if not located in the school, is considered present and in membership (e.g., field trip, structured learning experience, community-based instruction).

- **In-school suspensions:** A student temporarily removed from his or her regular classroom to in-school suspension is considered present and in membership, provided the student is afforded the opportunity to continue to:
  - Appropriately participate in the general curriculum; and
  - For students with disabilities, receive the services specified on the child’s IEP, and participate with nondisabled children to the extent they would have in their current placement.

- **Out-of-school suspensions:** A student on out-of-school suspension is considered in membership and not present unless he or she receives home instruction as defined above. Students receiving short-term suspension must be provided with academic instruction that addresses the New Jersey Student Learning Standards within five days of the suspension (N.J.A.C. 6A:16-7.2(a)5). Students receiving long-term suspension must be provided with educational services (academic instruction and support services) within five days of the suspension (N.J.A.C. 6A:16-7.3(a)9).

- **Extended non-illness absences:** School districts should develop a policy that determines when to record a student who is not in school for an extended period of time for reasons other than illness (e.g., travel with family) as a dropout. A student may be considered a transfer during the extended leave when the student is re-enrolled in and attending another school (in the U.S. or abroad).
  - It is recommended that “each school should have a policy that a student must attend a specified number of days out of the 180 required days in order to be considered for promotion to the next grade or for graduation” (New Jersey School Register, Section 2.7.3).
  - NOTE: Schools should consider the potential implications of dis-enrolling a student for the purposes of reporting student attendance data with regard to its potential impact on other accountability measures and any possible financial consequences.
**How is Chronic Absenteeism Measured in New Jersey?**

**Student-level absentee rate:** Each student’s absentee rate is calculated based on the fields of *Cumulative Days Present* and *Cumulative Days in Membership* collected in NJ SMART. *Cumulative Days Present* (P) is subtracted from the *Cumulative Days in Membership* (M), and this number is divided by the *Cumulative Days in Membership* (M).

\[
\frac{M - P}{M}
\]

If the student-level absentee rate is equal to or greater than 10%, the student is chronically absent.

**School-level chronic absenteeism:** The school-level chronic absenteeism rate is calculated by dividing the number of chronically absent students during the school year by the total number of students enrolled in the school.

**What is Important to Know When Implementing this Guidance?**

**Beginning with School Year 2017-18,** the following changes will be made:

- Attendance data for active and inactive students will be collected in SID Management. Previously, attendance data for active students was collected in the State Data Submission and attendance data for inactive students was collected in the SID Data Submission.

- The inclusion of attendance data for inactive students is required under ESSA. Therefore, both active and inactive student records for all students enrolled/registered in a school during the annual reporting period from July 1 through June 30 will be included in the calculation of chronic absenteeism. This will apply for EdFacts reporting requirements, the New Jersey School Performance Reports, and for ESSA accountability.

Districts must verify that data related to **attendance and student subgroup information** fields in the final NJ SMART submission are accurate as these are the source variables used for all chronic absenteeism calculations. (Please note: NJQSAC, Operations Indicator 1, verifies that school districts certify and provide complete data to NJ SMART on schedule and with a low error rate.)

School-level chronic absenteeism rates will be calculated using student records as submitted to SID Management by **June 29, 2018.** **Districts will not have an opportunity to change their data after their final SID Management submission.** Questions regarding management of student records may be directed to NJSMART@pcgus.com.

**How Does this Work in Practice?**

**Example 1:** David is in 11th grade and his school has 181 days in session during the school year. He was absent 3 days due to college visits and 2 days due to illness; arrived to school 30 minutes late in the morning 2 times; and left an hour early for a soccer game on 5 occasions. Notes: The days that he was tardy or left school early would not be factored into the equation, as he attended school for at least one hour in the morning and one hour in the afternoon on those days; and his college visits would not be considered *days in membership* because he is in grade 11.
David’s absentee rate: \(\frac{178 - 176}{178} = 1\%\)

David has 178 cumulative \textit{days in membership} (181 school days in session minus 3 days for his college visits) and 176 \textit{cumulative days present} (181 school days in session minus 5 days absent, including 2 days sick and 3 days college visit). \textbf{He would not be considered chronically absent.}

- What if, \textit{in addition to the days missed above}, David’s family takes him on a two-week vacation during the school year?

  David’s absentee rate: \(\frac{178 - 166}{178} = 7\%\)

  David’s \textit{cumulative days present} are now 166 (181 school days in session minus 15 days absent, including 2 days sick, 3 days college visit and 10 vacation days). \textbf{He would not be considered chronically absent.}

- What if, \textit{in addition to the days missed above}, David skips school for 4 days and the next month receives a 2-day out-of-school suspension for repeatedly using a cell phone in class against school policy? Note, when suspended, David was \textit{not} present in school or able to participate in the general curriculum for that day.

  David’s absentee rate: \(\frac{178 - 160}{178} = 10\%\)

  David’s \textit{cumulative days present} are now 160 (181 school days in session – 21 days absent, including 2 days sick, 3 days college visit, 10 vacation days, 4 days skipped, and 2 days suspended). \textbf{David would be considered chronically absent with a rate of 10\%.}

**Example 2:** Sarah is in 12\textsuperscript{th} grade and her school has 181 days in session during the school year. Sarah is the nighttime assistant manager at a fast-food restaurant to help support her family and the restaurant scheduled her to cover a day shift 11 times.

Sarah’s absentee rate: \(\frac{181 - 170}{181} = 6\%\)

\textbf{Sarah would not be considered chronically absent.}

What if, \textit{in addition to the days missed above}, Sarah is absent for two weeks due to illness, but receives home instruction during the second week, by a certified teacher, sufficient to continue academic progress based upon her ability to participate? Note: Sarah is considered absent for only 5 of those 10 days since she received home instruction in accordance with N.J.A.C 6A:16-10.1 during one of the two weeks.

Sarah’s absentee rate: \(\frac{181 - 165}{181} = 9\%\)

\textbf{Sarah would not be considered chronically absent.}
What About Truancy?

Truancy is defined as 10 or more cumulative unexcused absences (N.J.A.C. 6A:16-1.3). All school districts are required to have a policy and procedure that include a definition of unexcused absences that count toward truancy; thus, how “excused” and “unexcused” absences are defined for purposes of expectations and consequences regarding truancy, student conduct, promotion, retention and award of credit is a local decision (N.J.A.C. 6A:16-7.6(a)3). The NJ SMART Cumulative Days Towards Truancy field is not considered in the calculation of chronic absenteeism.

General Considerations Regarding Chronic Absenteeism

What school is responsible for the student’s attendance?

The school a student attends is always responsible for properly documenting a student’s daily attendance and following this guidance. It is the accountable school district’s responsibility to submit the final student attendance data from the attending school into the days in membership and days present fields in NJ SMART. In about 95% of cases, a student’s accountable school and attending school are identical, but there are rare instances where the accountable school may not be the attending school. For example, a student attending an approved private school for students with disabilities will have his or her attendance reported by the public school he or she would otherwise attend. Districts should pay careful attention to entering the proper CDS (county, district, school) codes for a student’s resident, receiving and attending school in NJ SMART so that the student is assigned the proper accountable school.

Are preschool students included in the calculations for chronic absenteeism?

This guidance should be followed in the recording of attendance for all preschool students enrolled in New Jersey public schools. However, preschool students are not included in the calculation of school and district accountability scores for chronic absenteeism. Preschool chronic absenteeism rates will be displayed in the school performance reports but they will not factor into any accountability measure.

If a district excuses an absence for a reason that is not one of the five allowable reasons defined above, does that absence count in the calculation of the school’s chronic absenteeism rate?

A student who is absent for a full day with an excused absence pursuant to the school district’s definition of “excused” (see What about Truancy?) must be recorded as having a day in membership and day absent for that day. An “excused” absence that is not one of the five allowable reasons above, does count as an absence in the determination of whether the student was chronically absent for the year.

Can schools continue to record “excused” absences for local purposes?

It is important to note that schools can determine how “excused” and “unexcused” absences are defined for the purposes of expectations and consequences regarding truancy, student conduct, promotion, retention, and the award of course credit, pursuant to N.J.A.C. 6A:16-7.6. School districts can take any and all action authorized by their policies and procedures when categorizing these absences.
However, a school must report student attendance to the NJDOE in accordance with the guidelines in this document. For State reporting purposes, a student can only be recorded as present or absent. Therefore, a student with an “excused” absence per local decision must be marked absent when reported to NJDOE. The only exception is that a school may have a day in session that would not be counted as a day in membership for a particular student based on the five allowable reasons defined above.

If a student registered with my school at the beginning of the year but never attended, will that impact the school’s chronic absenteeism rate?

No. As of the 10th consecutive day of non-attendance, assuming district/school investigations have been performed (pursuant to N.J.A.C. 6A:16-7.6) and the results are conclusive, the appropriate dropout code can be recorded in the New Jersey School Register. As per NJ SMART rules, the School Exit date is to be recorded as: "The year, month, and day of the first day after the date of a student's last attendance in a school." For students who were enrolled at the beginning of a school year but never attended the school during the year, the exit date is the first day of the school year, regardless of the actual date the district determines the student is no longer in the district. Consequently, the days the student was not at school before being dropped should not be considered days in membership and students who were enrolled but never attended should be recorded as having 0 days in membership and 0 days present.

If a school is advised by a family that a student is going to be taking a lengthy time off for vacation, should the school dis-enroll the student and then re-enroll her when she returns?

Schools should review “extended non-illness absences” above. Given that one student’s absence should not significantly impact your chronic absence rate, schools should consider the possible implications of dis-enrolling a student for the purposes of reporting student attendance data with regard to its potential impact on other accountability measures as well as any possible financial consequences.

How should attendance be reported for shared-time vocational students?

Shared-time students are those who attend two different schools in one day for a half day each. For example, students who spend a half school day in an academic high school and a half day in a county vocational school are enrolled in the high school and also in the appropriate county vocational school. For shared-time students, each day is counted as a ½ day in membership for each school. Shared-time students are either counted each day as ½ day present or ½ day absent at each school. (A shared-time student must attend at least one hour to be counted present.) Therefore, if a school has 180 days in session for the school year, a shared-time student would have 90 days in membership at his or her academic high school and 90 days in membership at the county vocational school. The academic high school is responsible for submitting shared-time student attendance data to the SID submission based on half day attendance at the academic school. The vocational school must submit shared-time student attendance data separately in the CTE submission based on half day attendance at the vocational school.
Can a student’s schedule be modified? If a schedule is modified, how should attendance be reported?

The definitions for days in membership, day in session, and days present are provided on pages 2 to 4 of this document.

For students with disabilities, pursuant to N.J.A.C. 6A:14-4.1(c), the length of the school day and the academic year of programs must be at least as long as that established for nondisabled students. However, the IEP team may, in its discretion, in rare cases, alter the length of the school day based on the needs of the student. The IEP team may also make a decision, based on the individual needs of the student, that the student is unable to attend school and should receive special education and related services in a different setting or manner, such as through home instruction, all or part of the time. If the IEP team makes this decision, and the information is included in the student’s IEP, then for attendance purposes, the student should be marked as “present” in your SIS when he or she is educated in the educational placement(s) set forth in his or her IEP.

For any student, pursuant to N.J.S.A. 18A:38-26, regular attendance must be during all the days and hours that the public schools are in session in the district, unless it is shown to the satisfaction of the board of education of the district that the mental health of the child is such that he or she cannot benefit from instruction in the school or that the bodily condition of the child is such as to prevent his or her attendance at school. A student with a modified schedule under either of these conditions should be marked as “present” for the full day in your SIS when he or she only attends school for the modified time.

For general education students, apart from those circumstances described above, a student’s schedule may not be modified.

What Funds Can Be Used to Support Student Attendance Initiatives?

Under ESSA, when chronic absenteeism is identified and documented as an issue through a comprehensive needs assessment, funding for initiatives to improve student attendance may come from Title I, Part A and Title IV, Part A. Likewise, local education agencies (LEAs) may use Title II funds to provide training for school personnel to address issues related to school conditions for student learning, including chronic absenteeism. Additionally, if the attendance issue relates to English language learners, Title III funds may be used. (Schoolwide programs may use funds from any Title.)

Resources for Implementing Guidance and Using Data to Improve Attendance

- Review New Jersey School Register (note Chapter 3, The Attendance Record)
- Review N.J.A.C. 6A:16-7 and N.J.A.C. 6A:32-8
- Review NJ SMART SID Management Student Handbook
- Review Supplemental Guidance: NJ SMART SID Management FAQs
- Review a list of various resources to improve student attendance on the New Jersey Department of Education’s Attendance, Truancy & Chronic Absenteeism website, including NJDOE’s Strategies for Addressing Chronic Absenteeism
- Contact the Office of Student Support Services at attendance@doe.nj.gov
