SUBJECT: **NJ FamilyCare – Emergency Card and Electronic Transmission of Student Information**

In 2008, P.L. 2008, Chapter 38 was signed into law and **mandates** that all children age 18 and under have health insurance. All relevant state agencies continue to engage in outreach strategies to help families meet this requirement. Since the passage of that legislation, school districts have played a major part in the outreach and identification of uninsured children and families. The Departments of Education and Human Services would like to continue to engage school districts in ensuring that students and families lacking health insurance are informed about the options available to them. To enhance our collective outreach efforts, we are requesting that you employ the use of the school emergency card that is requested from parents and guardians at the beginning of each school year.

A **sample emergency card** was provided to you in May 2009 (see updated attachment) and it reflected the additional queries related to health insurance. In addition to inquiring whether children have health insurance, the sample card specifically requests parental permission to share the information with NJ FamilyCare to remain in compliance with FERPA requirements and N.J.A.C. 6A:32-7.1(g). Again, we are not requesting that you replace your emergency card with the attached sample. However, schools districts should have revised the emergency cards to include the questions on health insurance and parental permission to share the information.

The student's health insurance status is paramount and should be asked annually. If the student is uninsured then their information should be sent using the comma delimited spreadsheet described below.

In addition, knowing a student's status as a free or reduced lunch recipient enables NJ FamilyCare to efficiently use an express process to enroll uninsured students into NJ FamilyCare/Medicaid.. This process provides more immediate coverage to eligible children.

With regard to the **electronic transmission of student information**, in order for NJ FamilyCare staff to contact families to enroll eligible students, they need to know which students have been identified as uninsured as well as which students are uninsured AND eligible for free or reduced lunch. Page 2

The electronic format and transfer of this information should pose the least amount of disruption to school districts as possible. Therefore, we are once again asking that each school district collect each school's information and compile the information into one district wide MS Excel Spreadsheet. The fields in the spreadsheet should include the data elements outlined in the attachment titled "Mail File Fields." Districts must send a **MS Comma Delimited Excel Spreadsheet (.csv)**. Only students who are **not** insured need to be included on this spreadsheet. However, the uninsured students should be listed regardless of their status as free or reduced lunch recipients. Please ensure that families signed to authorize the sharing of the child's health insurance status or did not opt out of having their Free or Reduced Price Lunch information shared with NJ FamilyCare. Completed district spreadsheets should be forwarded via email to [Syeebra.Palmer@dhs.state.nj.us](mailto:Syeebra.Palmer@dhs.state.nj.us) by October 30<sup>th</sup>.

It is important to note that many schools have implemented numerous methods of communication and outreach from notices attached to report cards to information in parent resource centers and materials at back-to-school nights to inform and notify parents and guardians of NJ FamilyCare. We acknowledge the outstanding efforts of many school districts to identify children who do not have access to health insurance.

Thank you in advance for your cooperation in this important effort. Through our collective efforts, we can ensure that children who lack health insurance have access to quality healthcare. If you have any questions concerning this matter, please contact Heidi J. Smith, Director, NJ FamilyCare Outreach, New Jersey Department of Human Services, at (609) 588-3526.
