

energymasterplan@bpu.state.nj.us

I am writing to urge you to improve the draft Energy Master Plan (EMP) by looking towards increased energy efficiency and renewable energy, and decreased reliance on LNG, diesel, and coal.

We must promote energy efficiency and renewable energy as a way to reduce the impacts of global warming, improve public health, reduce our reliance on foreign oil and dirty energy sources, and create new jobs and businesses in up-and-coming industries.

I would appreciate a response to this request.
