Subject: [EXTERNAL] Energy Master Plan comment
Date: Friday, October 05, 2018 9:06:24 PM

As a resident of Morris County, I am all for a rapid transition to renewable energy. Our state should not be investing or directing tax payer dollars in dirty energy infrastructure—such as oil and natural gas pipelines, sub-stations, etc. We should be investing in natural and clean sources of energy such as solar and wind.

The people of New Jersey are a vocal group, I encourage the Board to actively seek out public comment more broadly, if there's any question about what the people of New Jersey care about.
