Subject: [EXTERNAL] NJ is the Garden State, not the Pipeline State
Date: Thursday, September 12, 2019 6:01:53 AM

We need a moratorium on all NJ fossil fuel projects! Why? (1) Science - fossil fuels contribute to global warming; (2) Environment - pipelines destroy ecologically sensitive areas; (3) Economy - the wave of the future is clean, renewable energy, such as solar and wind power - that's where the jobs will be; (4) Air pollution - fossil fuels spew out air pollution; (5) Property values - home values will plunge - who wants to live next to a gas compressor?; (6) New Jersey is the Garden State, not the Pipeline State!
