Subject: [EXTERNAL] NJ Energy Master Plan
Date: Wednesday, September 11, 2019 7:29:41 AM

Clean, renewable energy plan with interim measurable percentage carbon reductions to meet 100% renewable electricity is the plan for New Jerseyans.

Carbon neutral is a gimmick perverting the intent for ending use of fossil fuels.
Carbon neutral maintains fossil fuel usage which is a non-starter.

We, the citizens, urgently need, want, demand, expect clean, renewable electricity.
We are living in the 21st century not the 1800's.

We have the scientific knowledge and technology to reverse the CO2 destroying
our ecosystems, our planet.

Sustainable solutions are staring you in the face. Use them.
Look around to other cities in the U.S. and around the world deploying
sustainable electricity solutions.

Anything less is a travesty.

Best,
Diane Hope Kuenstler
