Subject: [EXTERNAL] 2019 Draft Energy Master Plan
Date: Monday, September 16, 2019 9:53:21 AM

Hello,

I am a constituent in Hudson County with adult-onset asthma due to poor air quality (air pollution), and I am writing to request a moratorium on all fossil fuel projects.

The state of Texas uses 40% renewable energy whereas the state of New Jersey still only uses 4% renewable energy.

We must invest in renewables NOW to prevent further health problems in our communities.

New Jersey used to be the Garden State, and it must be so again.

Thank you,
Emmanuelle Morgen
