Subject: [EXTERNAL] fossil fuel infrastructure
Date: Wednesday, September 11, 2019 11:39:57 AM

Dear Governor Murphy,

I believe we in NJ must move aggressively to build our renewable and sustainable energy infrastructure. This does not include pipelines and power plants for more fracked gas or oil. I urge you to permanently deny permits for the NESE, Roseland and other fossil fuel projects as well as to prohibit construction before permits are granted. We need to encourage a coalition between home builders and green energy suppliers so that all new construction is renewable energy compatible. There is no time to lose here!

Thank you.
