Subject: [EXTERNAL] Energy Master Plan
Date: Tuesday, September 10, 2019 7:35:25 PM

The Governor's Energy Master Plan is currently inadequate to meet the climate emergency. It must include a moratorium on all new fossil fuel projects until greenhouse gas emissions are effectively regulated. These new projects will increase our emissions by over 30%! We must aim for 100% clean renewable energy in electricity by 2035 and be fully decarbonized by 2050.

Sincerely,

Giovanni Sce (Summit, NJ, 07901)
