

NJ Board of Public Utilities
44 S Clinton Avenue
Trenton, NJ 08625

12 September 2019

Dear NJ Board of Public Utilities,

Greener JC is an environmental action organization committed to supporting a more sustainable future in Jersey City. The organization's actions include but are not limited to, promoting waste and energy reduction through community outreach and educational actions, supporting sustainable development efforts, and facilitate partnerships to help the community be resilient in the face of global climate change.

Greener JC is contacting the Board to request that PSE&G takes on a project to change Jersey City's existing street lamps to LED fixtures.

Greener JC fully supports Goal 3.1.5 of the Draft EMP to "Revise street lighting tariffs as necessary to incentivize mass adoption of energy efficiency initiatives" and believes this Goal and its proceedings should be implemented as soon as soon as possible to make it easier for all municipalities to switch.

Additionally, it is urgent that Jersey City makes the switch to LED now to begin savings and emissions reductions for our great city and its residence.

Should you have any further questions or concerns, please reach out to greenerJC@gmail.com.

Sincerely,

DocuSigned by:
