RE: IEP feedback

Dear BPU,

The proposed master plan for combatting the climate emergency is woefully inadequate! We absolutely need an immediate moratorium on all new fossil fuel construction including pipelines as well as new power plant constructions. We need to develop 100% clean energy sources. Natural gas is NOT clean energy! We need to eliminate sources of methane which is much more dangerous as a greenhouse gas than carbon dioxide. The proposed plan concentrates on all the wrong actions and has no chance of coming anywhere near its stated goals.

I would appreciate a response to my request.

Sincerely,  
Mrs. Ruth Adams
