Subject: [EXTERNAL] IEP Feedback

To Whom it may Concern,

New Jersey can and should be a global leader in addressing our climate emergency. Instead, I am alarmed by the findings presented in the Integrated Energy Plan. I demand you take all steps to address these critical structural deficiencies before finalizing the IEP and EMP. Improvements to the IEP should include:

- any modeling scenarios that cut NJ's emissions 45% before 2030 as recommended by IPCC 2018 report
 - modeling for a goal of carbon-free energy for New Jersey
 - modeling for immediate moratorium on any new fossil fuel infrastructure
 - front loading emission reductions to have the most significant impact on our climate emergency
 - accurately estimating the global warming potential of short-lived climate pollutants like methane and black carbon
 - counting social costs of continued reliance and use of fossil fuels
 - flexibility to use the best of some plans now and others later
 - valuing meaningful public input
 - consideration of potential impact of future regulatory and technological changes
 - any mechanisms or recommendations of how to decrease fossil fuel use.
-
- Thank you for your consideration in this important matter.
