Subject: Proposed Energy Plan

Dear Members of the Board of Public Utilities,

Now is the time to turn New Jersey around and resume our place as a leader in environmental issues. During the last administration, the BPU stalled the federal funding of wind turbine development, among other short sighted environmental actions, and now we are behind. It is up to each of you to aggressively pursue a clean, green energy plan—a plan for which history will thank you.

There must be an immediate moratorium on the development and application of fossil fuel projects—across the board. I know it's big money involved. We are at the crossroads where we can develop a strong plan and reach the goals required. We are all responsible for the health of future generations now.

Do your best for the people of the state of New Jersey.

Respectfully submitted,

Mrs. Maryjane Genestra
