RE: IEP feedback

Dear BPU,

I have participated in the webinar with the Rocky Mountain Institute to learn about the modelling for the EMP and have tuned in to the reactions from Empower NJ, the Sierra Club, and Clean Water Action. The IEP could be improved by the following

- modeling scenarios that cut NJ's emissions 45% before 2030 as an interim goal to become more confident that we can reach the 2050 goal.
- modeling for immediate moratorium on any new fossil fuel infrastructure.
- front loading emission reductions to have the most significant impact on our climate emergency
- accurately estimating the global warming potential of short-lived climate pollutants like methane and black carbon
- flexibility to use the best of some plans now and others later, as technology develops

I would appreciate a response to my request.

Sincerely,  
Dr. Marian Glenn
