Subject: [EXTERNAL] Energy Master Plan, NO CARBON INFRASTRUCTURE INCREASES: NJ voter feedback

To the BPU:

The Energy Master Plan for New Jersey MUST include one hardest step:

NO NEW DOLLARS FOR ADDITIONAL CARBON INFRASTRUCTURE IN NEW JERSEY TO BUILD OR INCREASE CARBON CAPACITY, BEGINNING IMMEDIATELY, INCLUDING REJECTION WITH PREJUDICE OF ALL SUBMITTED PLANS NOT YET APPROVED

Every new dollar spent on carbon infrastructure capacity makes it that much harder to stop.

Don't allow the problem to become worse! **STOP ALL INCREASES TO CARBON INFRASTRUCTURE CAPACITY NOW.**

Thanks for your responsible consideration of our planet's and our children's future.
