Subject: [EXTERNAL] Integrated Energy Plan

I urge you to make improvements to the IEP so that NJ can live up to the state's potential as a leader in combatting the climate crisis. This is URGENT! Improvements should include:

- all modeling scenarios that cut NJ's emissions 45% before 2030 as recommended by IPCC 2018 report
- modeling for a goal of carbon-free energy for New Jersey
- modeling for immediate moratorium on any new fossil fuel infrastructure
- front loading emission reductions to have the most significant impact on our climate emergency
- accurately estimating the global warming potential of short-lived climate pollutants like methane and black carbon
- counting social costs of continued reliance and use of fossil fuels
- flexibility to use the best of some plans now and others later
- valuing meaningful public input
- consideration of potential impact of future regulatory and technological changes
- any mechanisms or recommendations of how to decrease fossil fuel use

Thank you for doing your part to save our planet!

Eve Peterson
South Orange, NJ
