Subject: [EXTERNAL] 2019 Draft Energy Master Plan
Date: Monday, September 16, 2019 7:42:18 AM

Despite the emphasis on incorporating environmental justice into all plans, the NJ EMP continues to allow applications to place powerplants in or adjacent to environmental justice communities and flood plains such as the Meadowlands, near where I live in North Bergen. A ban on all new fossil fuel projects is the only honest solution to a call for renewable energy.
