Subject: [EXTERNAL] Governor Murphy's energy master plan
Date: Monday, September 02, 2019 8:54:45 PM

If New Jersey is going to lead in the movement to reduce the warming of our planet and clean our state of pollution, Governor Murphy must take a strong stand against fossil fuel infrastructure in our state. It is not enough to invest in more clean energy projects. We simply cannot have more fossil fuel infrastructure built or installed in New Jersey. It all has to stop.
