Subject: [EXTERNAL] 2019 Draft Energy Master Plan
Date: Wednesday, September 11, 2019 9:16:45 AM

The EMP's goals are inadequate to address the immediate emergency we are facing.

Our clean energy goals must be 100% renewable energy for electricity by 2035 and 100% renewable energy economy wide by 2050. These are readily attainable goals whose obstacles are mainly political, not technological or financial, when all costs and benefits are considered.

Thank you.
