Subject: [EXTERNAL] Fossil Fuel Plants in NJ???
Date: Sunday, September 15, 2019 8:47:17 PM

The scientists tell us we have ten years to dramatically reduce greenhouse gas emissions in order to avoid climate catastrophe. We can't possibly do that if we add more fossil fuel plants and pipelines. We need a moratorium now on new fossil fuel projects.

ALSO my property value is decreasing daily thanks to my HORRENDOUS commute situation. I heard you recently saying that many NJ'er are opting to move out of state to find a better tax rate and easier commute. I will soon be counted as one of them. It's not a lovely place to live; it's very stressful.
