Governor Murphy,

I am a resident of Freehold and would like you to eliminate fossil fuel projects in the state. Our home has solar panels and last winter we took a vacation to Palm Desert, CA. It was amazing to see the number of wind farms and solar panel farms. Southern CA is showing the way forward. Please ban all new fossil fuel based projects. I'm sure that Rutgers and Princeton have some Professors who will be glad to help the state determine how best to proceed.

Steve
