1st Booster Dose

5-11

12+

2nd Booster Dose

50+

12+ who are
moderately or severely
immunocompromised

18+ who received both
a primary dose and booster
dose of Johnson & Johnson
(J&J) vaccine

- People should receive a 1st booster dose at least 2 months after a J&J primary series vaccine or at least 5 months after a Pfizer or Moderna (mRNA) primary series vaccine
- Individuals moderately to severely immunocompromised should receive 1st booster dose at least 3 months after the mRNA primary series doses
- Immunocompromised = Individuals with a weakened immune system due to certain health conditions and related treatments

- A 2nd booster dose is recommended at least 4 months after the 1st booster dose for individuals: (a) aged 12+ and moderately to severely immunocompromised, (b) aged 18+ who received a J&J primary dose and a J&J 1st booster dose, and (c) aged 50+
- People may only receive Pfizer (ages 12+) or Moderna (ages 18+) vaccines for 2nd booster dose
