

SEVERE AND FATAL PEDIATRIC INFLUENZA: CDRSS QUICK ENTRY GUIDE

- Once logged into CDRSS, enter or access the CDRSS case. If the outbreak section does not yet appear in the case, go to the navigation bar and select “Outbreak Information”

- Next, you will need to add an investigation to a case. From the Outbreak/Investigation, click on the radio button for “Investigation” and then find “I-2024-29917” from the drop down. Select “OTHER” for case role and type “SEVERE PED FLU CASE” for case role comment. Save and Close on the bottom right. The outbreak will now appear in the case.

Choose: Outbreak Investigation

Exposure Setting: --Select One--

* Investigation#: I-2024-29917

* Case Role: OTHER

* Case Role Comment: SEVERE PED FLU CASE

Outbreak/Investigation Case Classification: CONFIRMED

Number: I-2024-29917

Start Date: End Date:

Location Name: PEDIATRIC INFLUENZA SURVEILLANCE

- To modify the survey, click “Edit Questionnaire Information” and this will display a pop-up box with questionnaire.

↓ Outbreak Information

↓ PED FLU

DID THE PATIENT DIE?

WAS A SPECIMEN COLLECTED FOR BACTERIAL CULTURE FROM A NORMALLY STERILE SITE (E.G. BLOOD, CEREBROSPINAL FLUID [CSF], OR PLEURAL FLUID)? SPECIMENS COLLECTED GREATER THAN 24 HOURS AFTER DEATH ARE NOT STERILE.

WERE OTHER RESPIRATORY SPECIMENS COLLECTED FOR BACTERIAL CULTURE FROM A NON-STERILE SITE (E.G. SPUTUM, ET TUBE ASPIRATE)?

WAS A SPECIMEN (E.G. FIXED LUNG TISSUE) COLLECTED FROM AN AUTOPSY FOR TESTING OF BACTERIAL PATHOGENS BY A LOCAL OR STATE

[Edit Questionnaire Information](#)

- Complete the questionnaire and click “Save & Close” on the bottom right of the questionnaire.

DID THE PATIENT DIE? ⓘ

Yes No

WAS A SPECIMEN COLLECTED FOR BACTERIAL CULTURE FROM A NORMALLY STERILE SITE (E.G. BLOOD, CEREBROSPINAL FLUID [CSF], OR PLEURAL FLUID)? SPECIMENS COLLECTED GREATER THAN 24 HOURS AFTER I

Yes No

WERE OTHER RESPIRATORY SPECIMENS COLLECTED FOR BACTERIAL CULTURE FROM A NON-STERILE SITE (E.G. SPUTUM, ET TUBE ASPIRATE)? ⓘ

Yes No

WAS A SPECIMEN (E.G. FIXED LUNG TISSUE) COLLECTED FROM AN AUTOPSY FOR TESTING OF BACTERIAL PATHOGENS BY A LOCAL OR STATE PATHOLOGIST? ⓘ

Yes No
