COVID-19 (Coronavirus 2019)
QUICK FACTS

Know the signs
Although COVID-19 is an illness caused by a new strain of coronavirus, it is not much different than other respiratory viruses. Learn more below!

Symptoms of COVID-19
- fever
- cough
- shortness of breath

IMPORTANT POINT!
Most people have mild symptoms and get better on their own at home. Those most at risk for severe illness are the elderly and those who have other health problems.

WHEN TO SEEK MEDICAL HELP!
If you have any of the following, you should call your health care provider:
- difficulty breathing
- high fever
- other unusual or concerning symptoms

Prevention tips
Preventing COVID-19 is much like preventing other respiratory illnesses like colds and flu.

- wash your hands
  Wash them often with soap and water.
- stay home
  Stay home when sick and for a full 24 hours after your fever goes away.
- don’t touch your face
  This is the easiest way for germs to get into your body.
- cover coughs and sneezes
  This keeps your germs away from others and off your hands.
- keep sanitizer close
  Use sanitizer with at least 60% alcohol, use it often and tell children and people around you to do the same.
- eat right
  Eating healthy, balanced meals can strengthen your immune system.
- exercise
  It boosts your immune system and speeds recovery from illness.

If you have underlying health conditions such as heart disease, diabetes, lung disease, cancer, etc., talk to your doctor now and come up with a plan on what to do if you become sick.

Have questions? Call the COVID-19 call center, open 24/7 at 1-800-222-1222 or 1-800-962-1253 if in NJ but using a non-NJ cell phone
