

COVID-19 Vaccine for Children and Teens

COVID-19 vaccine is recommended for everyone 6 months and older. Everyone ages 5 years and older should also receive a COVID-19 vaccine booster*

Vaccination is important because it can help:

Prevent serious illness and possible hospitalization

Prevent the spread of COVID-19 in schools and communities

Prevent serious health issues such as **MIS-C****

Keep kids in school for in-person learning

Bring back sports, play-dates, and activities

Protect family members and those who can't get vaccinated

Get vaccinated: covid19.nj.gov/finder

For more information: nj.gov/health
Vaccines are free regardless of insurance or immigration status.

* Parental or legal guardian consent is required for those under age 18 years.

** Multisystem inflammatory syndrome in children (MIS-C) is a condition where different body parts can become inflamed.
