Keep Masking Up, NJ!

Face masks are strongly recommended for both **vaccinated and unvaccinated** people in indoor settings where there is *increased risk*:

- Crowded indoor settings
- Close contact indoors with others who may not be fully vaccinated
- Indoors where vaccine status of others is unknown
- Indoors with a person who is immunocompromised or at increased risk for severe disease

Social distancing, masking, and other safety measures are still required in high-risk areas such as healthcare settings, public transportation, child care centers, correctional facilities, and homeless shelters. The combination of COVID-19 vaccination and continued precautions to protect yourself and others will offer the best protection from getting and spreading COVID-19.
