Table 1: New behavior codes (Reportable neoplasms)

WHO has changed behavior codes for the following terms which result in **previously non-reportable neoplasms becoming reportable** for cases diagnosed 1/1/2021 forward. DO NOT report cases diagnosed prior to 1/1/2021.

Table 2: New behavior codes (Non-reportable neoplasms)

WHO has changed behavior codes for the following terms which result in **reportable neoplasms becoming non-reportable** beginning with cases diagnosed 1/1/2021. Continue reporting these cases when diagnosed prior to 1/1/2021.

Table 3: Deleted ICD-O codes in ICD-O-3.2

Per ICD-O-3.2, several ICD-O **codes have been removed and the histologies moved to other codes.** The comment column provides coding instructions for cases diagnosed prior to 1/1/2021 and 1/1/2021 forward. This table lists only **reportable** neoplasms.

Table 4: Changes in reportable terminology

(*) WHO has revised preferred terminology for these neoplasms **and no longer requires "malignant" to be used in the term in order to code behavior of /3**

Consults

If a report is sent out for consult and the results are different than the original reports, record the results from the consult.

★ **Consults always take priority** ★

3936 Ulceration (Melanoma Skin)

Melanoma ulceration is the absence of an intact epidermis overlying the primary melanoma based upon microscopic (histopathological) examination.

- **Code 1** if any biopsy (punch, shave, excisional, etc.) or wide excision is positive for ulceration in the presence of an underlying melanoma.
- **Code 0** if all specimens are negative OR one specimen is negative and the other is unknown.

Ulceration must be caused by an underlying melanoma.

Ulceration caused by trauma from a previous procedure should not be coded as positive for this SSDI!
