

# Leading Causes of Death among New Jersey Residents

## Preliminary 2020 Death Certificate Data

**Updated 5/21/21**

Leading cause-of-death data represent the most frequently occurring causes of death among those causes eligible to be ranked.

Certain causes of death – even some that are of great public health importance – are not ranked individually because they are part of a broader category. For example, motor vehicle accidents are included under “unintentional injuries,” and lung cancer is included under “cancer.”

Leading causes of death are always ranked in relationship to one another. This means the rank of a specific cause may change even if its mortality rate has not changed. On the other hand, the ranking can remain the same even if its mortality rate increases or decreases.<sup>1</sup>

Cause of death ranking is based on the underlying cause of death from the death certificate record.

The counts and rankings in this document are based on death certificate data as of February 11, 2021. Subsequent updates to the 2020 database may result in changes to some counts which may in turn affect rankings where the number of deaths due to one cause is very close to the number of deaths due to another cause.

1. Leading Causes of Death, National Vital Statistics System, National Center for Health Statistics. <https://www.cdc.gov/nchs/nvss/leading-causes-of-death.htm>

<https://www.state.nj.us/health/chs/documents/Prelim2020LCOD.pdf>

**5/21/21 Update: Although counts have changed since the 2/11/21 data file, the ranking of COVID-19 as a leading cause of death has not changed for any subpopulation with the exception of Somerset County where it went from #3 to #2, surpassing cancer by a count of 3 deaths. The change is noted on pages 10 and 11.**

## Leading Causes of Death among New Jersey Residents by Sex, Preliminary 2020 Data

Rank	All NJ residents		Male		Female	
	Cause	Count	Cause	Count	Cause	Count
	All causes of death	95,472	All causes of death	48,646	All causes of death	46,821
1	Heart disease	19,501	Heart disease	10,162	Heart disease	9,339
2	COVID-19	16,318	COVID-19	9,037	Cancer	7,823
3	Cancer	15,492	Cancer	7,668	COVID-19	7,280
4	Unintentional injuries	4,369	Unintentional injuries	3,017	Stroke	2,042
5	Stroke	3,688	Stroke	1,646	Alzheimer disease	1,945
6	CLRD	2,925	Diabetes	1,377	CLRD	1,692
7	Alzheimer disease	2,666	CLRD	1,233	Unintentional injuries	1,352
8	Diabetes	2,424	Septicemia	1,010	Septicemia	1,054
9	Septicemia	2,064	Influenza and pneumonia	896	Diabetes	1,047
10	Kidney disease	1,666	Kidney disease	862	Kidney disease	804

**Notes:**

CLRD is chronic lower respiratory diseases

Unintentional injuries include injuries due to unintentional poisonings (including drugs), motor vehicle crashes, falls, drownings, fires, etc.

### Leading Causes of Death among New Jersey Residents by Age Group, Preliminary 2020 Data

Rank	< 25 years old		25-44 years old		45-64 years old		65-84 years old		85+ years old	
	Cause	Count	Cause	Count	Cause	Count	Cause	Count	Cause	Count
	All causes of death	1,144	All causes of death	4,248	All causes of death	16,843	All causes of death	40,338	All causes of death	32,898
1	Unintentional injuries	282	Unintentional injuries	1,482	Cancer	3,573	Cancer	8,421	Heart disease	8,706
2	Homicide	91	COVID-19	409	COVID-19	3,007	Heart disease	7,710	COVID-19	5,239
3	Suicide	79	Cancer	351	Heart disease	2,708	COVID-19	7,647	Cancer	3,090
4	Cancer	57	Heart disease	341	Unintentional injuries	1,406	Stroke	1,543	Alzheimer disease	1,870
5	Heart disease	36	Suicide	192	Diabetes	570	CLRD	1,501	Stroke	1,612
6	COVID-19	15	Homicide	187	Chronic liver disease	505	Diabetes	1,210	CLRD	1,051
7	Stroke	12	Chronic liver disease	107	Stroke	453	Septicemia	1,013	Septicemia	648
8			Diabetes	73	Septicemia	353	Kidney disease	779	Influenza and pneumonia	634
9			Stroke	68	CLRD	341	Alzheimer disease	778	Kidney disease	623
10			Septicemia	42	Influenza and pneumonia	243	Influenza and pneumonia	713	Diabetes	565

**Notes:**

Causes with fewer than 10 deaths are not shown.

Chronic liver disease includes cirrhosis

CLRD is chronic lower respiratory diseases

Unintentional injuries include injuries due to unintentional poisonings (including drugs), motor vehicle crashes, falls, drownings, fires, etc.
