

# Get Extra Protection with the 2024–2025 COVID-19 Vaccine!

For Adults 65+ and the IMMUNOCOMPROMISED

People who are at higher risk of getting very sick from COVID-19 and can benefit from extra protection from a vaccine include:

- Adults 65 years of age and older.
- Individuals six months and older who have moderately or severely weakened immune systems (immunocompromised).

## CDC RECOMMENDATIONS:\*

### 65+ YEARS OF AGE

- Get **TWO doses** six months apart (or at least two months in between doses).
- If you are unvaccinated and get the 2024-2025 Novavax COVID-19 vaccine as your initial series,\*\* it is recommended to get **TWO doses** of Novavax followed by a **third dose** of any COVID-19 vaccine six months later.

### IMMUNOCOMPROMISED (6 MONTHS & OLDER)

- Get **TWO doses** six months apart (or at least two months in between doses).
- If you are unvaccinated, complete the initial series with the 2024-2025 COVID-19 vaccine followed by **ONE dose** of the 2024-2025 COVID-19 vaccine six months later.
- You may get additional doses of the 2024-2025 vaccine after talking with your health care provider.

**Talk with your health care provider and visit**

## FIND VACCINES & GET VACCINATED!

Visit [vaccines.gov](https://vaccines.gov)

For more information, visit [nj.gov/health/vaccines/covid-19](https://nj.gov/health/vaccines/covid-19) or scan the QR code ➡

\*The recommended vaccine, dose, and timing may differ depending on your age, previous vaccination history, and underlying medical conditions (e.g.; diabetes, overweight, high blood pressure etc.). Talk with your health care provider to see what will be best for you. For more information, visit [cdc.gov/covid/index.html](https://cdc.gov/covid/index.html).

\*\* The initial series is the beginning or primary vaccine dose(s) needed to help protect against getting very sick from COVID-19.
