

COVID-19 Variants: What You Need to Know

FACTS ABOUT VARIANTS

- Variants (strains) are different versions of a virus that constantly change over time. Variants can spread more easily or cause people to get sicker.
- The Centers for Disease Control and Prevention (CDC) continues to closely track how variants change and how they may affect our health.

GET VACCINATED AND PROTECT YOURSELF FROM COVID-19 VARIANTS

- Get the 2024-2025 COVID-19 vaccine to stay protected against the most current strains. The vaccines were updated to match current strains.
- People who are unvaccinated, or are not up to date, have a higher chance of getting very sick, being hospitalized, or dying from COVID-19.

WHERE TO FIND COVID-19 VACCINES

- Visit nj.gov/health/vaccines/covid-19 or scan the QR code.
- Visit vaccines.gov.
- Call the CDC Information Line at **1-800-232-0233**

For CDC's COVID-19 variant tracker, visit covid.cdc.gov/covid-data-tracker/#variant-summary.

For variant monitoring in New Jersey, visit nj.gov/health/cd/statistics/covid/index.shtml
