

Getting the COVID-19 Vaccine

You don't need a prescription!

- **Six months of age and older?** Talk to your health care provider about getting the COVID-19 vaccine.
- Getting the vaccine is the best way to protect yourself and your loved ones from serious illness and hospitalization.
- COVID-19 vaccines can be given at the same time as other recommended vaccines.

Vaccination is especially important for:

- Children two years and younger and adults 65 years and older Pregnant people
- Anyone with high-risk conditions (like asthma, cancer) or high-risk factors for severe COVID-19 illness
- Anyone who is unvaccinated or not up to date with COVID-19 vaccination

Find COVID-19 vaccines:

- At your health care provider's office, community health centers, local health departments, and pharmacies.
- Call first to confirm availability, accepted insurance, or if an appointment is required.
- Free COVID-19 vaccines may be available through your insurance or the Vaccines for Children (VFC) or 317 programs.*
