| Other, NH             | 3.3%   | 2.8%       |
| Maternal age groups   |        |            |
| <20                   | 5.2%   | 3.3%       |
| 20-24                 | 18.8%  | 14.2%      |
| 25-29                 | 27.2%  | 25.5%      |
| 30-34                 | 30.6%  | 33.7%      |
| 35-39                 | 14.9%  | 18.8%      |
| 40+                   | 3.3%   | 4.6%       |

## **Summary of Findings:**

Figure 1: Camden county has fewer cardiovascular and gastrointestinal birth defects compared to state average.

Figure 2: Asian children have the highest rate of orofacial conditions.

Figure 3: Older mothers (35+) are more likely to have children with chromosomal abnormality.
