Tips for Feeding Your Child

-  By the age of one all liquids should be offered to children in a cup. Only in a cup!
-  If your child gets thirsty between meals and snacks, offer water.
-  Mealtime should be a relaxed and happy time. Set a good example for your children.
-  Let your child's appetite be your guide. Don't force your child to eat. It is normal for your child's appetite to vary from day to day. Don't be concerned if your child is fussy and refuses to eat.
-  Expect your child's growth and appetite to slow down around 2 years of age.
-  Tastes change. Food once refused may be later accepted. Keep offering different foods to your child.
-  During the preschool years, your child may want to eat the same foods for several days. Don't worry; usually these "food jags" are short lived.
-  Active play and exercise should be encouraged everyday. This helps your child grow in a healthy way.
