What is a Designated Use?

New Jersey’s [Surface Water Quality Standards (SWQS)] establish the designated uses of the State's surface waters, classify surface waters based on those uses, and specify the water quality criteria and other policies necessary to attain those uses. Designated uses include water supply for drinking, agriculture and industrial uses, fish consumption, shellfish resources, propagation of fish and wildlife, and recreation.

The table below show the designated use information for your municipality. For more information on Surface Water Quality, see the Healthy Community Planning Report for this municipality.

### Map

- Municipalities are color-coded to indicate their comparison to the state average.
- The map includes major roads and towns within Bergen County.
- The date and location of the data are displayed on the map.

### Key Points

- The map highlights the distribution of inpatient visits for AMI within Bergen County.
- Municipalities are grouped by their comparison status.

---

**Note:** The map and data are for illustrative purposes and do not reflect current or updated data. The map is intended to provide a general overview of the distribution of inpatient visits for AMI in the area.
