New Jersey’s [Surface Water Quality Standards (SWQS)](#) establish the designated uses of the State's surface waters, classify surface waters based on those uses, and specify the water quality criteria and other policies necessary to attain those uses. Designated uses include water supply for drinking, agriculture and industrial uses, fish consumption, shellfish resources, propagation of fish and wildlife, and recreation.

The table below show the designated use information for your municipality. For more information on Surface Water Quality, see the Healthy Community Planning Report for this municipality.

### Data Source
- Age-adjusted Death Rate
- Deaths for Heart Disease
- Municipalities
- Date: 4/16/2022

### Analysis
- Municipalities above the state average for heart disease deaths are shaded in blue.
- Municipalities below the state average are shaded in yellow.
- Municipalities with no difference are shaded in green.
- Municipalities with suppressed data are shaded in gray.

### Conclusion
- Hoboken City has a higher age-adjusted death rate for heart disease compared to the state average.
- neighboring municipalities such as TPK, North Bergen Twp, West New York Town, Kearny Town, Harrison Town, Union City, and Jersey City have varying death rates.
