New Jersey’s Surface Water Quality Standards (SWQS) establish the designated uses of the State’s surface waters, classify surface waters based on those uses, and specify the water quality criteria and other policies necessary to attain those uses. Designated uses include water supply for drinking, agriculture and industrial uses, fish consumption, shellfish resources, propagation of fish and wildlife, and recreation.

The table below shows the designated use information for your municipality. For more information on Surface Water Quality, see the Healthy Community Planning Report for this municipality.

### Map

The map shows the municipalities in Mercer County with the legend indicating the age-adjusted rate for heat-related illnesses in Emergency Department visits from 2016 to 2019. The municipalities are color-coded to indicate whether they are above, below, or have no difference compared to the state average. The map includes major roads and city boundaries for better geographical context.
