New Jersey’s [Surface Water Quality Standards (SWQS)](https://www.nj.gov/dep/wq/swqs/) establish the designated uses of the State's surface waters, classify surface waters based on those uses, and specify the water quality criteria and other policies necessary to attain those uses. Designated uses include water supply for drinking, agriculture and industrial uses, fish consumption, shellfish resources, propagation of fish and wildlife, and recreation.

The table below show the designated use information for your municipality. For more information on Surface Water Quality, see the Healthy Community Planning Report for this municipality.

### Map

The map shows the distribution of cancer deaths across various municipalities in Morris County, New Jersey. The map includes municipalities such as Mount Arlington Boro, Jefferson Twp, Randolph Twp, and others. The map uses colors to indicate municipalities above, below, or showing no difference in age-adjusted death rates compared to the state average.

### Key Points
- **Mount Arlington Boro** is highlighted on the map to indicate the focus of the data.
- The map shows a range of municipalities with varying death rates, categorized as above, below, or no difference.
- The map includes various highways and roads for orientation.
- The scale on the map indicates distances in miles.
