New Jersey’s Surface Water Quality Standards (SWQS) establish the designated uses of the State’s surface waters, classify surface waters based on those uses, and specify the water quality criteria and other policies necessary to attain those uses. Designated uses include water supply for drinking, agriculture and industrial uses, fish consumption, shellfish resources, propagation of fish and wildlife, and recreation.

The table below show the designated use information for your municipality. For more information on Surface Water Quality, see the Healthy Community Planning Report for this municipality.

Significance: Low Birth Weight indicates infants weighing less than 5 lb, 8 oz at birth. This reflects early health and developmental risks. Municipalities are categorized based on their birth rate compared to the state average:
- Above: Birth rate is higher than the state average.
- Below: Birth rate is lower than the state average.
- No Difference: Birth rate is similar to the state average.
- Suppressed: Data is not available or suppressed for privacy reasons.

Map showing municipalities and their birth rate significance in New Jersey. Legend indicates the municipalities by their color coding, with Ship Bottom Boro highlighted in pink.
