Air Quality Index (AQI) Days above 100 (3 yr Avg) 2018 to 2020

Date: 4/18/2022
New Jersey's Surface Water Quality Standards (SWQS) establish the designated uses of the State’s surface waters, classify surface waters based on those uses, and specify the water quality criteria and other policies necessary to attain those uses. Designated uses include water supply for drinking, agriculture and industrial uses, fish consumption, shellfish resources, propagation of fish and wildlife, and recreation.

The table below show the designated use information for your municipality. For more information on Surface Water Quality, see the Healthy Community Planning Report for this municipality.

### Map

- Municipalities represented in the map include Warren Twp, Bernardsville Boro, Bernards Twp, Somerville Boro, Mansville Boro, Bridgewater Twp, and others.
- The map shows the distribution of birth rates across various municipalities.

### Notes
- The map and data are color-coded to indicate the birth rate for each municipality.
- Municipalities with birth rates above the state average are shown in blue, while those below are shown in yellow.
- Municipalities with no significant difference are shown in light blue, and those with suppressed data are shown in gray.
