**Source: New Jersey Healthcare-Associated Infections for 2017 submitted through the National Healthcare Safety Network (NHSN).**

<sup>a</sup> Expected (E)= # of infections predicted using the 2015 Baseline and risk-adjusted models.

**Important to note that if Expected is <1, the SIR is not calculated as the result is not precise.**

<sup>b</sup> Standardized Infection Ratio (SIR)= Observed (O)/ Expected (E)

<sup>‡</sup> Each hospital is compared to the National Ratio=1 which is derived using the CDC's NHSN data from the 2015 baseline.

L indicates hospital infections are LOWER than infections seen nationally.

H indicates hospital infections are HIGHER than infections seen nationally.

S indicates hospital infections are SIMILAR to infections seen nationally.

– SIR is not calculated because the Expected is < 1.
