NJ is committed to promoting patient safety and preventing serious preventable adverse events. In 2004, the **New Jersey Patient Safety Act** (P.L. 2004, c9) was signed into law. The statute was designed to improve patient safety in hospitals and other health care facilities by establishing a serious preventable adverse event reporting system. This site is designed to help healthcare facilities develop strong patient safety programs, collect and analyze aggregate data and fulfill the law's mandatory reporting requirements
