ACTION TEAMS

- How do the 5 Ps* fit in with the cross-cutting issues (EPR)?
  - The existing Ps may not address equity and resilience at all or enough and those are gaps the ACTs will need to fill.
- New timeline will be posted online
  - Shows that more time is available and needs to be used to do deep research
  - For HNJ2030, the process may have more impact than the product.

- o Tangible processes (e.g., HECCs) may help ACTs feel like things are being accomplished
- Healthy Communities will be hosting 5 listening sessions in October to gather info.
- Primary Care Needs Assessment (Jennifer O) survey to stakeholders (October) with results by December
- Rural Health Needs Assessment (Damon) survey results by February
