TOPIC AREA SELECTION
TOPIC AREA SELECTION

• Topic areas will be determined by HNJAC
• Aiming for 4-6 broad topic areas (TAs)
  • 20 was a lot to manage for HNJ2020
  • Resulted in uneven distribution of objective count across TAs
  • HP2030 will have fewer TAs than HP2020 (42)
  • Options include: life course, risk factors, diseases and conditions, SDOH, etc.
• See handout for examples/ideas
TOPIC AREA SELECTION GUIDANCE

• Refine the list based on the “most important” aspects of health:
  • Reducing deaths
