**THE DOCTORAL INTERNSHIP IN HEALTH SERVICE PSYCHOLOGY
OF
TRENTON PSYCHIATRIC HOSPITAL**

Dorothea Lynde Dix

ACCREDITATION

The Psychology Department of Trenton Psychiatric Hospital (TPH), in conjunction with the New Jersey Department of Health/Division of Behavioral Health Services offers a one-year, full-time (1750 hours), APA-accredited Doctoral Internship in Health Service Psychology. The internship program has a rich history dating back to 1952 when it was founded by Albert Ellis, PhD. The program has been APA-accredited since 1990. The last site visit occurred in August 2017, and the program was awarded accreditation for the maximum review period of 10 years.

TPH is an historic, 400-bed, inpatient psychiatric hospital for adults, founded in 1848 by Dorothea Lynde Dix, a pioneer of advocacy for people with mental illness. The hospital and its staff continue that legacy through a shared mission to provide hope, wellness, recovery, and successful community reintegration for patients.

Because of its progressive philosophies and a preferred location in New Jersey's capital city, between New York City and Philadelphia, TPH's Doctoral Internship in Health Service Psychology is highly competitive.

COMMITMENT TO DIVERSITY

At Trenton Psychiatric Hospital, we are committed to diversity with an active Diversity and Inclusion Committee composed of members of the Internship Supervisors Committee. These members are themselves diverse in terms of age, gender, language, ethnicity, culture, etc., each has different areas of expertise, and each has demonstrated a commitment to diversity. The committee has developed several guidelines to ensure consistent and long-term practices to attract and retain diverse interns and staff. In addition, we have identified a Diversity Liaison, who is one of the members of the Diversity and Inclusion Committee. This individual's role is to advocate for diversity as a core component in recruitment and retention of interns and psychologists. Specifically, the Diversity Liaison will serve as a resource for interns and psychologists to discuss concerns and ideas regarding diversity. Interns will be encouraged to help develop and become part of activities and events planned by the Diversity and Inclusion Committee. We also are committed to the provision of training in various areas, including diversity. To enhance our Colloquia training, we collaborated with two psychologists who are experts in Multicultural Training and have developed an interactive training on Cultural Humility and Clinical Psychology in a Forensic Psychiatric Hospital. The Director of Internship Training is also the Chair of the CE/CME Committee and members of the Diversity and Inclusion Committee have been appointed to represent the psychology department in making recommendations for topics and speakers with a focus on individual difference and diversity. Our goal is to create a welcoming and affirming environment for all of our staff and interns to grow together as professionals.

STIPEND AND BENEFITS

Competitive compensation and health benefits package

The stipend for the 2022-2023 internship class is funded at the gross salary of \$40, 252.55. The workweek consists of five days of clinical experience/training. Interns receive approximately 67.2 hours of vacation time, 75.6 hours of sick leave, and 33.6 hours of paid administrative leave. Interns also enjoy 13 paid State Holidays. Medical benefits are provided. In the event of an injury, interns will receive Workman's Compensation. Interns will also be enrolled in the DCRP pension plan. If an intern does not become employed by the state after internship, the money withheld for the pension will be reimbursed upon request. TPH Interns receive lunch in the employee cafeteria at no charge.

INTERN CANDIDATE REQUIREMENTS

Setting High Standards for Care

To be considered for TPH's Doctoral Internship in Health Service Psychology, applicants must be graduates of an accredited college or university with a Bachelor's Degree, enrolled in a doctoral program in applied psychology (clinical or counseling) at an accredited university or professional school and be approved by their University Training Director for internship. Successful applicants have completed 500 hours of therapy experience and 100 hours of assessment experience with graduate course training in each of the following areas:

1. Psychotherapeutic techniques and counseling with practicum experience
2. Objective and projective testing with practicum experience
3. Personality development and psychopathology
4. Theories of learning and motivation

5. Research design and statistical analysis
6. Group Therapy

Post-Doctoral Candidates (Changing Specialties)

Doctoral psychologists interested in changing their specialty to qualify in an applied area of psychology must be certified by a director of graduate professional training as having participated in an organized program in which the equivalent of pre-internship preparation (didactic and field experience) has been acquired. (See pre-doctoral requirements for specific work and practicum experience).

PHILOSOPHY AND EXPECTATIONS

The aim of the doctoral internship at TPH is to stimulate, support, and shape the professional growth of psychology interns. We seek both to build upon previously acquired competencies and to facilitate development of new clinical competencies and professional skills. While we seek to enhance development of a broad range of competencies and skills, an important aspect of our training philosophy is to provide all TPH interns with particular expertise in providing evidence-based psychological services and recognized best practices to individuals with serious and persistent psychopathology and who are involved in the legal system.

Upon completion of the program, we expect interns will:

1. Function as competent psychotherapists, psycho-diagnosticians and interdisciplinary treatment team members.
2. Effectively apply literature, supervision and continuing education to their clinical work.
3. Conduct themselves in a professional manner, in accordance with ethical and legal guidelines applicable to the setting in which they practice.
4. Possess sensitivities to individual and cultural differences that enable them to provide effective psychological treatment for the individuals they serve.

These expectations are achieved by providing interns with a program that integrates two broad training dimensions: (1) exposure to clinical and professional roles and experiences and (2) didactic and supervisory experiences. These experiences are structured according to the unique training needs of each intern.

The first training dimension, exposure to a range of clinical roles and experiences, is achieved through clinical and other professional role experiences at TPH and through training experiences on the specialty rotations that match the intern's training interests. Interns are exposed to patients representing a broad spectrum of psychopathology and diverse demographic backgrounds. Interns are also exposed to psychologists who function in a variety of professional roles: multidisciplinary treatment team member, unit administrator, medical staff member, and hospital committee member.

The second dimension of training, didactic and supervisory experiences, involves education and guidance. Interns receive both individual and group clinical supervision, including 2 to 3 hours weekly of one-to-one supervision and one hour of group supervision. Supervisors representing a range of theoretical orientations and areas of expertise in evidence-based practice and best practice standards provide guidance and feedback to interns. Interns also attend a state-wide colloquium series as well as seminars and in-service programs based at TPH which are offered on a regular basis.

Finally, interns' experiences are structured according to individualized training plans that incorporate intern, supervisor, and university input. New training plans are developed for interns for each 6-month rotation.

PRACTITIONER-SCHOLAR TRAINING MODEL

We conceptualize our training model as a practitioner-scholar model. Training at TPH is characterized by intensive clinical experience supported by didactic programming and supervision that exposes interns to current research and literature relevant to their clinical work. Prior to completing the internship, interns demonstrate integration of clinical work and scholarship through an Annual Project. Most interns' Annual Project is the development of new and innovative programming for the patients at TPH. Examples include a cognitive remediation program utilizing the Wii system, Acceptance and Commitment Therapy Groups (ACT), and competency restoration groups. As part of the colloquium series, interns will develop and present either a diagnostic or therapy case utilizing current evidence-based literature. Some interns have a particular interest in research. If an intern has such an interest, she/he may develop and carry out an original research project relevant to his/her clinical work with appropriate approvals.

THE CONTEXT OF TRAINING TRENTON PSYCHIATRIC HOSPITAL

Where is TPH? What is its mission? Who is treated there?

TPH is an inpatient psychiatric facility accredited by the Joint Commission. TPH maintains a census of approximately 400 adult patients. The hospital is located on the Trenton/Ewing border close to the Delaware River, approximately 20 miles northeast of Philadelphia and 60 miles southwest of Manhattan. It can be easily reached from the New Jersey Turnpike, I-95 or Route 1. TPH is also accessible via public transportation.

Mental health services in the state of New Jersey have been transformed by the wellness and recovery philosophy the state has adopted. TPH's Mission Statement is: "It is our mission to provide hope, healing and successful community reintegration for our patients by assisting them in managing their psychiatric symptoms and developing a personal path of wellness and recovery." TPH has taken significant steps to assure that a wellness philosophy shapes hospital treatment. Among the ways the wellness and recovery philosophy is being put into practice are:

- Staff members are trained to understand and apply a wellness and recovery paradigm
- Treatment includes psycho-educational and psychotherapeutic evidence-based approaches such as “Illness, Management, and Recovery” (IMR), Integrated Technology-based Cognitive Remediation (ITCR), Recovery Oriented Cognitive Therapy (CT-R), and Dialectical Behavior Therapy (DBT)
- Patients are being reintegrated into the community with the help of innovative programs and resources such as the Residential Intensive Support Team (RIST) and Supportive Housing, and case management services such as Program of Assertive Community Treatment (PACT) and Integrated Community Management Services (ICMS).

In addition, all NJ State Psychiatric Hospitals are embracing a Trauma Informed Care Model.

TPH provides inpatient psychiatric services primarily to residents of Mercer, Middlesex, and Monmouth counties. Residents of other counties presenting with special legal or other issues may also receive treatment at TPH. Patients 18 years of age and older, from diverse cultural and socioeconomic backgrounds, with serious and persistent mental illness and/or legal issues are provided mental health services designed to mitigate debilitating symptoms, enhance adaptive functioning, and facilitate successful reintegration into the community.

Hospital Organization: Four Treatment Sections

The hospital is divided into four primary sections. Each complex has unique functions, but is interdependent with other parts of the hospital.

Please note that due to the pandemic, TPH has taken safety precautions and requires the use of proper PPE in accordance with CDC guidelines and social distancing. As such groups are limited to a maximum capacity based on room size and treatment malls have been temporarily closed. Group and individual programming takes place on each unit.

The **Drake Complex** is composed of three coed, locked admissions units. Psychologists assess and treat involuntarily committed patients who present with acute symptoms such as delusions and hallucinations and behaviors including suicidality and aggression. In addition, interns gain a familiarity with the care of patients who have significant legal issues, including those on Detainer status, those found Not Guilty by Reason of Insanity (NGRI), those court ordered to be evaluated for competence to stand trial, and those charged with sex offenses. Treatment occurs in the context of a Treatment Mall setting within the Drake Complex which offers centralized programming to individuals in all 3 admissions units and aims to stabilize, support and ultimately discharge patients. Patients may stabilize quickly and return to the community or progress to other hospital units for further treatment. The intern placed in Drake gains experience and training on the unit where his or her supervisor provides psychological services.

The **Raycroft Complex** is composed of four locked units and provides “post-admission” treatment for patients determined to need continued acute care. The Raycroft Complex includes one female unit, two male units, and one coed unit. In addition to patients needing continued acute treatment, the Raycroft Complex also may include patients with sex offense charges, patients designated as NGRI, and patients being evaluated for competence to stand trial. Based on their Level of Supervision,

patients may attend programming within the Raycroft Complex or may go to the centralized Treatment Mall located in the nearby Lincoln Complex. At the Treatment Mall, patients from the Raycroft Complex attend diverse programming, including Sex Offender Specific treatment, Art Therapy, Music Therapy, Anger Management, Competency Restoration, DBT Skills Group and Yoga in addition to traditional process groups. The intern assigned to the Raycroft Complex gains experience and training on the unit where his or her supervisor is assigned but can also take cases from other units within the Raycroft Complex and throughout the hospital. Patients in the Raycroft Complex may also hold a job through the Vocational Rehabilitation program.

The **Lincoln Complex** contains four locked units including: the Lincoln Unit, providing coed treatment for patients with special medical needs; the Lazarus Cottage, providing coed DBT and substance use treatment; the Kennedy Cottage, considered a less-restrictive unit, housing a coed population who benefits from a unit-based Positive Behavioral Support program; and the King Cottage, now designated as a COVID positive unit in accordance with CDC guidelines so in the event of any positive cases, patients would go to this designated unit. Patients from these units, with the exception of King, attend programming in the Lincoln Complex Treatment Mall. Approximately 60% of patients in the Lincoln Complex units have legal issues or a history of violence. The intern assigned to the Lincoln Complex gains experience on the unit where the supervisor is assigned but can take cases from any unit in the Lincoln Complex and throughout the hospital. Patients in the Lincoln Complex may also hold a job through the Vocational Rehabilitation program.

The **Transitional Living Unit (TLU)** is open and unlocked. Patients who do well in the other complexes may transfer to TLU to reside in one of 12 renovated homes located on the hospital grounds, each housing five to eight patients. Patients may attend programming in Travers or in the Lincoln Complex Treatment Mall. Preparation for discharge back to the community is facilitated in part through residing in this home-like environment. Patients in TLU may also hold a job through the Vocational Rehabilitation program. The intern assigned to TLU is supervised by the Director of Internship Training and gains experience on both teams in TLU but also can take cases from other units throughout the hospital.

Training Rotations

Primary Rotations

The year is divided into two, six-month training rotations. Each intern has two primary assignments based on the intern's previous experiences, current training needs, and preferences. Exposure to hospital units outside of an intern's primary placements can also be arranged to broaden the diversity of the training experience.

Specialty Rotation

Depth and variety of experience are further promoted by having our interns participate in a third, in-house, specialty rotation. These rotations are designed to provide a deeper focus on evidence-based practice with a specific patient population or different types of assessment. Our specialty rotations include: DBT Milieu experience, Forensic Risk Assessment, Neuropsychological Assessment and Sex Offender Specific Treatment and Assessment. An effort is made to match each intern's training interests with his or her specialty rotation assignment.

THE CONTENT OF TRAINING

The TPH Doctoral Internship in Health Service Psychology has two broad training dimensions: (1) exposure to clinical and professional roles and experiences and (2) didactic and supervisory experiences. Six primary components of training fit into these dimensions. Psychotherapy, psychological assessment, professional role development, and specialty rotation experiences fall into the first dimension. Supervision and educational experiences fall in the second dimension.

1. **PSYCHOTHERAPY:**

Psychology Interns at TPH gain psychotherapy experience treating a variety of patients with intensive supervision. Interns' caseloads include patients displaying varying levels of psychopathology and diverse personal, cultural, and demographic characteristics. All interns gain experience with a patient population displaying severe and persistent psychopathology and forensic issues. Interns are exposed to a variety of theoretical viewpoints and treatment modalities with an emphasis on evidence-based/best practice. Each intern is observed doing individual and group psychotherapy. Interns meet with their supervisor between 1 – 1.5 hours per week. The Training Plans that are developed for each six-month rotation include identification of competencies and goals intended to promote growth as a psychotherapist. All interns gain extensive experience in individual and group therapy. At TPH therapy cases are chosen from the entire range of acute psychoses and chronic schizophrenias, major affective disorders, character disorders, dissociative disorders, neurological conditions, and substance use disorders. Supervisors employ supervision techniques such as direct observation, monitoring of taped sessions, feedback, case discussion, didactic instruction, role-playing, and discussion of assigned readings to foster theoretical understanding and technical competence.

2. **PSYCHOLOGICAL ASSESSMENT:**

Interns gain and improve skills in the administration, scoring and interpretation of major intelligence, neurological, objective, and projective test measures as well as violence and sexual violence risk assessments and actuarial assessment instruments such as the: WAIS-IV, WASI-II, WMS-IV, Folstein Mini Mental Status Exam, MMPI-3, MCMI-IV, Personality Assessment Inventory, Beck Scales, Rorschach, TAT, Columbia Suicidality Severity Rating Scales, Static 99-R, VRAG, SORAG, STABLE/ACUTE, and HCR-20 V3. Interns can access our many computerized scoring and interpretive systems for the aforementioned tests as directed by their supervisor, who evaluates how best to incorporate and utilize these tools based on the level of expertise of each particular intern. Interns meet with their supervisor between 1 – 1.5 hours per week. Interns are taught how to select tests to answer referral questions, learn to use the diagnostic categories of the *DSM-5*, develop clinical interviewing skills, and make specific and viable treatment recommendations. Referrals include violence and sexual violence risk, suicide risk, non-suicidal self-directed injury, differential diagnosis including level of intellectual functioning, neurological conditions, presence of thought, mood and character disorders, and PTSD. Interns will also identify the content of specific life and emotional issues unique to the individual being assessed.

3. PROFESSIONAL ROLE DEVELOPMENT:

Development of a positive professional image through identification with professional role models is a significant aspect of the program. In addition to their more traditional roles as therapists and psycho-diagnosticians, TPH psychologists are skilled facilitators of community meetings, planners of innovative programming efforts, and integral team members on their assigned units. By virtue of their treatment team experiences, interns gain exposure to different theoretical points of view and learn how to work with members of other disciplines. Psychology is also represented in leadership roles on all major hospital policy committees, including the Executive Committee of the Medical Staff, Violence Prevention Committee, Research Review Committee, and CE/CME Committee.

At TPH interns are exposed to various supervisory styles through their own supervision, and supervisors provide and review literature on supervision models and approaches to ensure knowledge and competency in methods of supervision. In addition, interns will have opportunities to engage in 1:1 peer supervision and supervision role-plays as well as provide consultative guidance to other health care professionals on their respective treatment teams, including members of other professional clinical disciplines (psychiatry, social work, rehabilitation staff) as well as nursing and paraprofessional staff. Interns also participate in a weekly, year-long Professional Development Seminar with fellow TPH psychology interns where they routinely engage in peer supervision in a group format and provide feedback on cases and a variety of issues that arise during the year. As part of her facilitation of the Professional Development Seminar, guidance on the provision of supervision is provided by the Director of Training.

4. SPECIALIZED CLINICAL EXPERIENCES:

Each intern spends a full year in a third specialty rotation at TPH. Assignment to the specialty rotation is designed to bring diversity to intern experiences by providing in-depth experience with specific patient populations that is more focused than the more general experience gained on the main rotation. Interns receive up to 1.5 hours of supervision by their specialty rotation supervisor.

5. SUPERVISION:

The internship program at TPH provides up to 1.5 hours of one-to-one supervision and 1 hour of group supervision per week by New Jersey licensed psychologists. Supervisors maintain a close relationship with their intern. Supervisors at TPH also have completed the NJ Department of Human Services year-long Supervisor Training Seminar or other seminars and training on the provision of supervision. Interns are assigned a primary supervisor and a specialty rotation supervisor. Interns also participate in the year-long Professional Development Seminar which includes weekly supervisory and didactic components facilitated by the Director of Internship Training. Interns also have the opportunity to participate in weekly peer supervision.

6. EDUCATIONAL EXPERIENCES:

To supplement their clinical experiences, TPH interns attend two days of training each month at a colloquium series. This is consistently one of the most highly rated aspects of the internship program and includes topics such as Cultural Humility, Competency to Stand Trial Evaluations, Forensic Risk

Assessment, treating patients with addictions and speakers who are leaders in the field in subjects such as forensic psychology and personality theory.

Interns also participate in a variety of didactic and experiential programs at TPH on a monthly basis throughout the year. TPH Psychologists provide in-service trainings on topics that include The Basics of DBT, Neuropsychological Assessment Overview, Ethics and Professional Standards, Motivational Interviewing and the Business and Practice of Psychology. Interns have additional opportunities for didactic training in TPH CE/CME Programs. Interns have opportunities to interact with trainees in other disciplines as well.

Intern performance evaluation, feedback, advisement, retention

The internship experience is divided into two six-month rotations. Interns are assigned to a primary unit for each rotation with a different primary supervisor for each rotation. Training plans are developed at the beginning of each rotation – at the beginning of the internship year and approximately six months into the internship year. At the completion of each six-month rotation, interns receive evaluations from their supervisors and provide evaluations of their supervisors. Interns remain assigned to their specialty rotation for the full year. Each intern's specialty rotation supervisor also completes Training Plans and evaluations.

Training plans and Evaluations include the following 10 Goals and objectives:

Goal 1 – To Achieve Competence in Psychological Assessment

Objective A: Clinical Interview Skills

Objective B: Diagnostic Skills

Objective C: Psychological Test Selection and Administration

Objective D: Psychological Test Scoring and Interpretation

Objective E: Assessment Writing Skills

Objective F: Patient Feedback Regarding Assessment

Goal 2 – To Achieve Competence in Psychotherapeutic Intervention

Objective A: Case Conceptualization and Treatment Planning

Objective B: Therapeutic Interventions and Confidentiality

Objective C: Patient Rapport

Objective D: Effective Use of Emotional Reactions (Countertransference)

Objective E: Group Therapy Skills and Preparation

Objective F: Patient Risk Assessment/Management

Objective G: Safety and Crisis Management

Goal 3 – To Achieve Competence in Consultation & Interdisciplinary Health Care

Objective A: Consultative Guidance

Objective B: Knowledge of the Treatment Roles of Other Disciplines

Objective C: Interdisciplinary Treatment Team Functioning

Goal 4 – To Achieve Competence in the Application of Literature and Supervision to Clinical Work

Objective A: General Psychological Knowledge

Objective B: Seeks Current Scientific Knowledge

Objective C: Develops and Implements Final Project
Objective D: Utilization of Supervision and Continuing Education

Goal 5 – To Achieve Competence in Ethics and Legal Matters

Objective A: Knowledge of Ethics and Law
Objective B: Knowledge of Policy, Procedure, and Reporting Guidelines

Goal 6 – To Achieve Competence in Professional Interpersonal behavior

Objective A: Professional Interpersonal Behavior
Objective B: Professional Verbal and Written Communication
Objective C: Communication with Supervisor

Goal 7 – To Achieve Competence in Professional Values, Attitudes, and Beliefs

Objective A: Uses Positive Coping Strategies in Dealing with Professional and Personal Challenges
Objective B: Professional Responsibility and Documentation
Objective C: Responsible and Efficient Time Management
Objective D: Administrative Competency

Goal 8 – To Achieve Competence in Individual and Cultural Diversity.

Objective A: Sensitivity to Patient Diversity
Objective B: Patient Rapport/Working Relationships with Diverse Patients
Objective C: Awareness of Own Individual Differences and Cultural and Ethnic Background

Goal 9 – To Achieve Competence in the Provision of Supervision

Objective A: Supervisor Competence
Objective B: Diversity
Objective C: Supervisory Relationship
Objective D: Feedback
Objective E: Problem of Professional Competence
Objective F: Ethical, Legal, and Regulatory Considerations

Goal 10 – To Achieve Competency in Utilization of Research

Objective A: Critical Review of Literature
Objective B: Research Guided Intervention
Objective C: Research Guided Assessment Practices
Objective D: Presentation of Research

In addition, interns actively participate in tailoring their training plans by providing preferences regarding main rotations, specialty rotations, and any specific skills, projects or research interests they have. These are incorporated in the training plans and evaluated by their supervisor at the end of each rotation.

Supervisors rate their supervisee on each objective applicable to their rotation on the following 5-point scale:

5 – Advanced Skills – Comparable to autonomous practice at the licensure-eligible level. This is the highest rating achievable during and at completion of pre-doctoral training. Competency is consistent with full psychology staff privilege level.

4 – High Intermediate – Occasional supervision needed. A frequent rating at completion of internship. Competency attained in all but non-routine cases; supervisor provides overall management of trainee's activities; depth of supervision varies as clinical needs warrant.

3 – Intermediate – Common rating throughout internship. Routine supervision of each activity.

2 – Entry level – Continued intensive supervision is needed. Most common rating for beginning interns. Routine, but intensive, supervision is needed in most areas.

1 – Needs remedial work – Requires remedial work as part of supervision process.

In addition, supervisors can provide qualitative comments for each Competency.

*** Interns are considered to be in Good Standing at mid-year if at least 50% of all rated objectives within each goal area are at a competence level of 3 or higher.

*** Interns are considered to be in Good Standing at the end of the year if all rated objectives within each goal area are at a competence level of 3 or higher. At least 50% of all rated objectives within each goal area will be at a competence level of 4 or higher.

Feedback and Advisement of interns is ongoing and occurs throughout the year, both formally, on a weekly basis during supervision, and informally, as requested by the intern or as determined by the supervisor. It is the goal of the internship program to retain all interns who begin the internship program. In the rare situation when it is recognized that an intern needs remedial work, a competency assessment form should be completed immediately, prior to the mid-year or end of year evaluation, and shared with the Intern and Director of Training. In order to allow the intern to gain competency and meet passing criteria for the rotation, these areas must be addressed proactively. In doing so, a Growth Plan needs to be developed and implemented promptly. Due process procedures are followed.

COMPLETION OF THE INTERNSHIP

Minimal requirements to complete the internship include: 1) a Good Standing rating for all evaluations; 2) a minimum of 1750 hours of training, as documented on a Training Hour Log and timesheets signed by the interns' primary supervisor; 3) a case presentation (therapy or diagnostic); 4) submission of an acceptable Annual project; and 5) completion of all required documentation, including supervisor evaluations, program evaluations, clinical progress notes and psychological assessments.

Interns interested in obtaining more than the minimum 1,750 hours of training can arrange, with their supervisor and proper documentation, to accumulate 2,000 hours or more in the TPH program.

POST INTERNSHIP

The long-term objective of our internship program is that our graduates are prepared and expected to work in a variety of professional settings and roles as psychologists. Many interns apply to our program specifically because they want to acquire psychological treatment skills with either a forensic population or individuals with severe and persistent psychopathology, consistent with the broad goals of our program identified in our literature. Most intern graduates go on to postdoctoral fellowships or are hired in staff

psychotherapist positions providing psychological services in forensic settings, psychiatric hospitals, and private practices, etc. Others are engaged in other professional activities such as consulting or research.

We encourage interns to continue on the professional path towards psychology licensure. We provide whatever guidance and assistance we can towards that goal. Most of our intern graduates have become licensed psychologists in New Jersey and other states. Others are in the process of becoming licensed.

MAINTENANCE OF RECORDS

In accordance with the Standards of Accreditation, TPH maintains documentation on Intern Performance and on Intern Complaints and Grievances. Records on Intern Performance are permanently maintained so that an intern's training experience, evaluations, and certificates of completion are available as evidence of the intern's progress through the program and for future reference and credentialing purposes. In the event of a Complaint or Grievance, TPH will keep records of all formal complaints and grievances that have been filed against the program and/or against individuals associated with the program. These will be made available for review by the Commission on Accreditation as part of their periodic review of the program.

THE PSYCHOLOGY DEPARTMENT

The hospital's psychology department is comprised of 15 psychologists, 4 psychology interns, 10 Behavioral Support Technicians (BSTs), and 2 Behavior Analysts. Eight full time psychologists are licensed in New Jersey, with several other department members licensed in other states, including Pennsylvania and New York. Supervisors subscribe to a variety of theoretical orientations and provide opportunities for exposure to diverse supervisory styles and professional roles. Qualified supervisors are New Jersey licensed psychologists who have attended a supervisor training course led by the former Chief of Psychology Services of New Jersey or have attended another form of training or supervision in the provision of supervision.

Psychology Department Staff

Director of Psychology/Director of Psychology Internship Training:

Dr. Nicole Waldron (Supervisor, Stratton Building) received her PsyD in Clinical Psychology from the Georgia School of Professional Psychology in 2000 and completed her APA-accredited internship at Trenton Psychiatric Hospital. She is a licensed psychologist in New Jersey, New York and Pennsylvania and owns a private practice. Dr. Waldron has been working for the State of New Jersey for 22 years, previously at the Special Treatment Unit (civil commitment unit for adult, male sex offenders). Her primary theoretical orientation is cognitive behavioral, but she adopts an eclectic approach in working with patients in a psychiatric inpatient setting. She is certified in Recovery Oriented Cognitive Therapy from the Aaron T. Beck Psychopathology Research Center. Her interests include the treatment of anxiety and depression, risk management, crisis counseling, cultural humility and the treatment and assessment of forensic populations. She has particular expertise in sex offender specific therapy and risk assessment and worked with administration to develop and expand the sex offender therapy program at TPH. She has extensive training and experience in the provision of supervision and Chairs multiple committees, including the Continuing Medical Education Committee. She has an interest in ethics and provides in-service training on Ethical Standards and Practice.

Assistant Director of Psychology Internship Training:

Dr. Karen Kohaut (Supervisor, Drake Complex) is a licensed psychologist and certified school psychologist in New Jersey and Pennsylvania. She received her Psy.D. in Clinical Psychology from the Institute for Graduate Clinical Psychology at Widener University in 2009. She has been a psychologist for the State of New Jersey since 2010. Dr. Kohaut's primary orientation is cognitive behavioral, and she has worked in inpatient, residential and school settings with a variety of patient populations. Dr. Kohaut has expertise in working with dually diagnosed, mentally ill, and substance abusing patients. Dr. Kohaut has professional interests in the treatment of mentally ill substance abusers, the use of motivational interviewing, delivery of evidence-based practice and conducting psychological and forensic assessment.

Supervisors and other Psychology Staff:

Dr. Kelsey Feret (Supervisor, Raycroft Complex) received her PsyD in Clinical Psychology from La Salle University in 2019. During her clinical practica, she focused on training in both forensic and neuropsychological subspecialties. She obtained experience with neuropsychological assessment as

well as court mandated treatment and assessment of sexual offenders and perpetrators of relationship violence in both outpatient and residential settings. Her doctoral research examined the role of emotions on implicit racism. Dr. Feret completed her pre-doctoral internship at Trenton Psychiatric Hospital with rotations on both the Lincoln and Raycroft complexes and her outplacement was in the neuropsychology department at Cooper University Hospital. After completing internship, Dr. Feret was contracted by TPH to provide cultural humility colloquia for the internship program in collaboration with another psychologist. Dr. Feret did a neuropsychology post-doctoral fellowship at Diversified Psychological Resources, which primarily involved neurocognitive assessments for a variety of concerns including neurodevelopmental and neurocognitive disorders, independent medical evaluations, presurgical evaluations, and the NFL Baseline Assessment Program. Her main areas of clinical and professional interest involve neuropsychological assessment, cultural humility, sex-offense specific treatment, personality disorders, PTSD and complex trauma, as well as violence risk assessment. Dr. Feret is also an EMDRIA approved EMDR therapist.

Dr. Linda Kavash (Drake Complex) received her PsyD in Clinical Psychology from Wright State University School of Professional Psychology in 1989. She completed an APA-accredited internship at the VA Medical Center in Perry Point, Maryland, gaining experience there in inpatient and outpatient settings, in addition to inpatient substance use treatment. She is currently a Pennsylvania licensed psychologist. Dr. Kavash has been employed by the state of NJ since 1990, having worked previously at Ancora Psychiatric Hospital and North Princeton Developmental Center. As such, she has worked with both acute and chronic inpatient populations, in addition to dually diagnosed patients with developmental disabilities and mental illness. Throughout, she has provided supervision to psychology staff, psychology interns, and behavioral support technicians. Dr. Kavash was trained in an eclectic approach to treatment, aimed at meeting the individual patient's needs. Her clinical interests include psychological assessment, trauma, and working with individuals with severe mental illness.

Dr. Anna Maleson (Supervisor, Raycroft Complex) is a New Jersey licensed psychologist who owns and operates a private practice. She has worked as a Clinical Psychologist for Trenton Psychiatric Hospital for over 10 years. Dr. Maleson earned her PhD in Clinical Psychology from Walden University. She graduated at the top of her class and is a member of the PSI CHI National Honors Society. Dr. Maleson is also an alumnus from The University of Pennsylvania where she was accepted into an accelerated program to earn her Master of Science degree. She is also an alumnus from Georgian Court College where she earned her BA with high honors and was on the Dean's List. During her 25 years of clinical experience, Dr. Maleson was an adjunct professor at Kean University and The College of St. Elizabeth; Clinical Coordinator for a brain injury program in Edison, NJ; Crisis Intervention Specialist who provided individual, family and group therapy along with assessment and testifying in court for juvenile legal cases in Somerset County; Supervisor and Mobile/Behavioral therapist in the underserved areas of the Poconos and East Stroudsburg, Pennsylvania; Clinician in an inpatient adolescent treatment center; treated and assessed foster children, and was the Director of a Partial Care Program in South Jersey. Areas of clinical competency include that of competency restoration, IST evaluations, CBT for A Crime Free Life, psychological and suicide risk assessments, along with cognitive testing. Dr. Maleson's theoretical orientation is Cognitive Behavioral Therapy with a strong focus on ACT, DBT and CBT. Other areas of clinical and professional interest are child and adolescent development, suicide prevention and awareness, bi-polar disorder, adult schizophrenia, court testimony, parenting and co-parenting, adult psychotherapy, and crisis intervention.

Dr. Jonathan Rapaport (Travers Complex) received a B.A. from Rutgers University where he was a Henry Rutgers Scholar. He has worked in private and state psychiatric hospitals, VA hospitals, community mental health centers, and private practices in Alabama, Pennsylvania, and New Jersey. Dr. Rapaport received a Ph.D. in Clinical Psychology from the University of Alabama and has worked as a clinical psychologist at Trenton Psychiatric Hospital since 1984. After a yearlong formal training in supervision, he began supervising psychology interns, which he has done continuously since 1985, supervising nearly 100 interns, 1 or 2 interns at a time for 6 months rotations. He emphasizes helping achieve interns' unique, specific professional goals. He has extensive experience supervising individual and group psychotherapy and psychodiagnostics. Dr. Rapaport enjoys working with psychology interns who are open to exploring different techniques to achieve personal and professional growth. His eclectic psychotherapeutic approach encompasses interpersonal, humanistic, psychodynamic, ACT, CBT, and pragmatic existentialism schools. He thoroughly enjoys utilizing projective and objective assessment tools to help understand patient's underlying psychodynamics, and has particular expertise in the MMPI-2, PAI, Rorschach and many other instruments. Dr. Rapaport has interests in forensic, private practice, and the advancement of psychology as a profession, such as mental health parity. He served on a Megan's Law Task Force, which reported to the Governor.

Dr. Mary Ann Rebel (Lincoln Complex) has a BA in Psychology from Siena College and an MA from University of Northern Colorado in Agency Counseling. She has a PhD in Counseling Psychology from Seton Hall University and completed her internship at Greystone Park Psychiatric Hospital. Dr. Rebel has held positions as a psychologist at Woodbridge Developmental Center, North Jersey Developmental Center and Hunterdon Developmental Center where she worked with Developmentally Disabled Clients and supervised multiple Behavior Support Technicians. She also has experience working with Mentally Ill/Chemically Addicted (MICA) patients at Greystone Park Psychiatric Hospital and Hagedorn Psychiatric Hospital. Some of her interests include stress management, psychological assessment and neuropsychology.

Dr. Suzanne Roussel (Supervisor, Lincoln Complex) is the psychologist on the Kennedy Positive Behavior Support Unit, where she works primarily with those with intellectual disabilities, learning disabilities, and other neurological concerns. She received her PsyD from Chestnut Hill College with a concentration in Psychological Assessment, and she completed an APA-accredited internship at Ancora Psychiatric Hospital. She also completed a 2-year post-doctoral fellowship in Clinical Neuropsychology at Beechwood Neurorehab in Langhorne, PA. Although psychological and neuropsychological assessment and evaluation has been a focal point in her career, Dr. Roussel has an eclectic experience repertoire working with individuals with a wide range of challenges, including serious, chronic mental illness, addictions, and personality disorders. Her theoretical orientation is primarily psychodynamic and person-centered, and she works effectively with patients by developing a strong therapeutic relationship. She has experience implementing a variety of therapeutic approaches including art therapy, writing therapy, psychodrama, CBT, and psychodynamic therapy. Dr. Roussel has also taught both graduate and undergraduate coursework at Chestnut Hill College and Holy Family University in Philadelphia, PA for several years. Her scholarly interests include the effects of psychopharmacology on neuropsychological test performance, ecological validity of neuropsychological testing, and personality disorders. She is also interested in holistic and non-traditional methods of healing, such as reiki, yoga, and chakra work, and divination for the purposes of gaining insight and honing intuition.

Dr. Kathleen Tobin (Supervisor, Lincoln Complex) received her PhD in Clinical Psychology from Alliant International University, San Francisco in 2007. She is a licensed psychologist in both New York (inactive status) and New Jersey, and completed her internship with the Department of Veterans Affairs in Northport, NY. Her postdoctoral training focused on the areas of neuropsychological assessment and the NEAR model of Cognitive Remediation at Columbia University. Here she also coordinated clinical research trials and conducted outpatient Cognitive Remediation groups throughout Bronx and Manhattan. Prior to joining Trenton Psychiatric Hospital, Dr. Tobin worked in the Department of Genetics at Rutgers University studying the genetic bases of Schizophrenia, Bipolar and Autism spectrum disorders. She currently is a treatment team member and psychologist on the Lazarus Unit and provides DBT individual, group and milieu therapy.

APPLICATION PROCEDURE

Application Form

We utilize the online APPIC APPLICATION FOR PSYCHOLOGY INTERNSHIP (AAPI) form available at APPIC's website, www.appic.org Click "APPI Online," complete the application AND submit all supportive materials electronically.

Supportive Materials

Supportive materials which should be scanned electronically and submitted in addition to the AAPI application form include:

- 1) A recent work sample (e.g., a psychological assessment).

Deadline

The DEADLINE for sending the APPLICATION (AAPI) and all supportive materials is NOVEMBER 1st.

Pre-Employment Requirements

Trenton Psychiatric Hospital is part of the Civil Service Commission and all positions, including Psychology Intern positions, are subject to pre-employment requirements. Being hired as a Psychology Intern at TPH is contingent upon satisfactory fingerprint clearance, background/reference checks and health screening. Applicants can be disqualified from employment during the background check process upon discovery of any of the following: a positive urine drug screen, history of arrest for possession of a controlled and dangerous substance, history of arrest for any charges related to theft, burglary or robbery, and history of arrest for any charges related to interpersonal violence. Regarding health screening, applicants are required to participate in a physical exam, which includes testing for COVID-19. Drug testing is mandatory prior to employment and employees, including psychology interns, are subject to random drug testing. Drug use is prohibited including marijuana/cannabis as well as products containing THC. Anyone who tests positive for marijuana/cannabis can be disqualified from employment regardless of medical need or the presence of a prescription. The physical and drug tests are paid for by TPH, and the candidate for employment is responsible for paying for the cost of the fingerprints.

Residency Requirement

The New Jersey First Act requires every person holding an office, employment, or position with the Executive, Legislative, or Judicial Branch of the State of New Jersey to have his or her primary residence in the State of New Jersey, unless exempt pursuant to the law. After September 1, 2011, any interns hired after the internship has ended, shall have one year from the date of employment to fulfill the principal residency requirement with the Department of Health.

Malpractice Insurance

It is also required that psychology interns be covered by malpractice insurance (\$1 million occurrence/\$3 million aggregate). Some schools offer coverage to doctoral students, and there are other low-cost options.

Further Questions or Clarification

If you have any further questions about our program or the application process, contact the Director of Training:

INTERNSHIP MATCHING, APPIC GUIDELINES, AND NEW JERSEY REGULATIONS

Trenton Psychiatric Hospital abides by APPIC board decisions applicable to all internship sites and participates in the national computer matching program. This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant. Intern applicants can obtain information about registering for the matching program at the matching program's web site: www.natmatch.com/psychint.

New Jersey laws and regulations require that offers of Psychology Internship positions to applicants identified through the national matching program are contingent upon necessary approvals following satisfactory fingerprinting clearance, background/reference checks, and health screening.

DISABILITY INFORMATION

TPH abides by federal and New Jersey regulations regarding disabilities. Information about resources for graduate students with disabilities is available from APA at the following internet link: <http://www.apa.org/pi/disability/resources/publications/resource-guide.aspx> . Additional information for students with disabilities is available from APPIC on their website at the internet link: <http://www.appic.org/Training-Resources/For-Students#HealthMatters> .

STATEMENT OF NONDISCRIMINATION

The doctoral internship in health service psychology abides by the New Jersey Law Against Discrimination (LAD) which prohibits employers from discriminating in any job-related action, including recruitment, interviewing, hiring, promotions, discharge, and compensation. The law also prohibits discrimination in the terms, conditions and privileges of employment as indicated in the law's specified protected categories. These protected categories include: race, creed, color, national origin, nationality, ancestry, age, sex (including pregnancy and sexual harassment), marital status, domestic partnership status, affectional or sexual orientation, atypical hereditary cellular or blood trait, genetic information liability for military service, mental or physical disability, or AIDS and HIV related illnesses. The LAD prohibits intentional discrimination based on any of these characteristics. Intentional discrimination may take the form of differential treatment of statements and conduct that reflect discriminatory animus or bias.

HOSPITAL AND OTHER INSTITUTIONAL POLICIES WITH WHICH THE PROGRAM COMPLIES

The program complies with all policies and procedures of the state and hospital that pertain to staff and intern rights, responsibilities, and personal development including:

State – NJ State Department of Personnel Equal Employment Opportunity/Affirmative Action Policy Statement, the New Jersey Law Against Discrimination, NJ State Policy Prohibiting Discrimination, Harassment or Hostile Environments in the Work Place.

Hospital – Including but not limited to NJ Policy Against Discrimination, Equal Employment Opportunities and Affirmative Action (3.001), Sexual Harassment (3.001.01), Code of Ethics

(2.401.17), TPH Employee Physical Exam Guidelines/Pre-Employment Health Screening for New Hires (3.305), Employee Physical Exam Guidelines: Assessment of Physical/Mental Incapacity (3.305.01), Research Review Committee (5.401), Guidelines for Use of Information Technology Resources (1.801), and Patient Abuse and Neglect (1.901).

For a complete description of a particular hospital policy and procedure, interns can visit our Intranet homepage at <http://tphweb/> and click "Template and Policy Search". Type in a policy number or key word. Applicants may receive policies upon request via email.

Internship Program Admissions

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:

The Psychology Department of TPH, in conjunction with the New Jersey Division of Mental Health and Addiction Services and affiliated outpatient and specialized training sites offers a one year, full-time (1750 hours), APA-accredited internship in Clinical Psychology. Interns are able to accrue 2000 hours if necessary for licensure in their state. Interns' core experience involves intensively supervised clinical work at TPH with an inpatient adult psychiatric and forensic population. TPH patients display a broad spectrum of psychopathology and are from diverse cultural, ethnic, and economic backgrounds. Interns are exposed to a range of theoretical orientations. They gain experience with varied treatment modalities and acquire assessment experience utilizing a range of assessment tools. Individualized competency-based training plans are developed for each intern, facilitating the development and expansion of a broad base of clinical skills. Goals of the internship are to graduate interns who will: 1. Function as competent psychotherapists, psychodiagnosticians and interdisciplinary treatment team members. 2. Effectively apply literature, supervision and continuing education to their clinical work. 3. Conduct themselves in a professional manner, in accordance with ethical and legal guidelines applicable to the setting in which they practice. 4. Possess sensitivity to individual and cultural differences that enable them to provide effective psychological treatment for the individuals they serve.

TPH's psychology department is comprised of 15 psychologists, 4 psychology interns, 2 behavior analysts, and 10 behavior support technicians. Eight full-time psychologists are licensed in New Jersey. The hospital is divided into 4 complexes: Drake – 3 admissions units; Raycroft – 4 extended acute locked units; Lincoln –3 less restrictive units comprised of patients with either medical issues, those with neurocognitive impairment who meet criteria for a Positive Behavior Support Unit, those who meet criteria for DBT milieu treatment, and a COVID-19 positive unit in accordance with CDC guidelines; and Travers – 12 unlocked cottages each housing between 5-8 patients comprise the Transitional Living Unit which helps to prepare patients for discharge. Each complex has unique functions but is interdependent with the other parts of the hospital. During the course of the year-long internship, each intern spends 6 months in 2 rotations in different sections of the hospital. Depth and variety of experience are further promoted by having our interns participate in a third, in-house, specialty rotation. These rotations are designed to provide a deeper focus on evidence-based practice with a specific patient population or different types of assessment. Our specialty rotations include: DBT Milieu experience, Forensic Risk Assessment, Neuropsychological Assessment and Sex Offender Specific Treatment and Assessment. An effort is made to match each intern's training interests with his or her specialty rotation assignment.

Interns will begin their day by attending Nursing Report and Life Management Meeting, which is a community meeting for patients. Interns will then participate in an interdisciplinary team meeting in which they will be assisting in writing treatment plans and updating patient safety plans. Interns will carry a caseload of 5-6 individual patients and co-facilitate 2-4 group sessions per week. Interns may see individual patients in the morning or afternoon and conduct groups in the afternoon. All staff members including interns are expected to document patient progress after each group or individual session in our Group Scheduling Application. Interns also conduct 4-6 assessments per 6-month rotation and will be working on integrative reports throughout the week. In addition on 2 Wednesdays per month, interns receive didactic training on a broad array of topics presented by leaders in the field. Interns will also receive in-service presentations by supervisory staff once a month and participate in the monthly department meeting.

Does the program require that applicants have received a minimum number of hours of the following at times of application? If Yes, indicate how many:

Total Direct Contact Intervention Hours	<input type="checkbox"/> N	<input checked="" type="checkbox"/> Y	Amount: 500
Total Direct Contact Assessment Hours	<input type="checkbox"/> N	<input checked="" type="checkbox"/> Y	Amount: 100

Describe any other required minimum criteria used to screen applicants:

Applicants must have a Master's Degree by the date of application deadline, and the graduate program must be APA-accredited.

Financial and Other Benefit Support for Upcoming Training Year
