Note: Denominator data was not available to calculate 2017 rates. Caution should be taken when comparing data to other states or with national estimates due to workers' compensation (WC) eligibility criteria and availability of data from WC programs varying among states. Effective October 1, 2015 healthcare organizations and providers were required to start using ICD-10-CM codes. The transition in classification from ICD-9-CM to ICD-10-CM may not be a one-to-one match, therefore caution should be taken when comparing data before and after the transition.
