

## Distribution of any Reported WRA among Ever-Employed Adults with Current Asthma, by Household Income and Respondent Education

The Figures below are based on those with current asthma who have ever been employed outside the home. Reports of work-related asthma varied with income and with education—ever-employed adults with current asthma and with higher levels of household income and education had less reported work-related asthma of any kind. The sample size was insufficient to look at factors associated with work-related asthma as diagnosed by a health professional.

### HOUSEHOLD INCOME

Percent of any Reported WRA among Ever-Employed Adults with Current Asthma, by Household Income  
NJ Asthma Call-back Survey (ACBS), 2008-2010

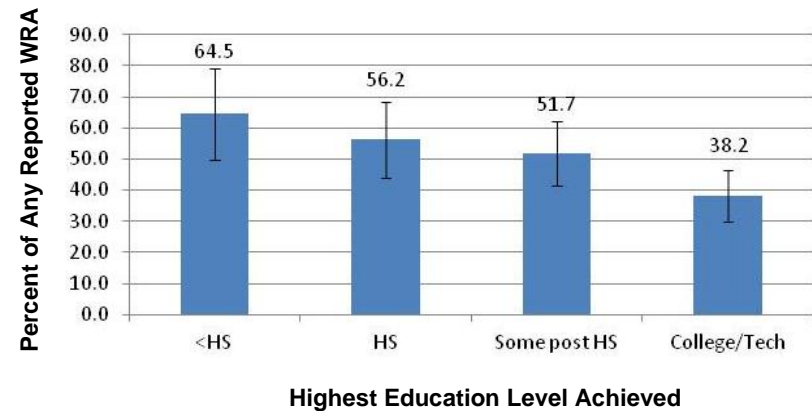

\*Rao-Scott Chi Square, p=.0287

\*Any Reported WRA—respondent reports that their asthma has been caused or aggravated by their current or a previous job and/or respondent has told a health professional or been told by a health professional that their asthma is work-related.

### RESPONDENT EDUCATION

Percent of any Reported WRA among Ever-Employed Adults with Current Asthma, by Respondent Education  
NJ Asthma Call-back Survey (ACBS), 2008-2010

\*Rao-Scott Chi Square, p=.0116

\*Any Reported WRA—respondent reports that their asthma has been caused or aggravated by their current or a previous job and/or respondent has told a health professional or been told by a health professional that their asthma is work-related.
