

ID	Mission Area	Core Capability	Draft Measure	Source
1	Common	Planning	Does the state/territory possess disaster planning provisions that address the need of populations with access and functional needs?	National Protection Framework, p. 30, and CPG 101 v2, p. 1-1.
2	Common	Public Information and Warning	Are the state's/territory's and all applicable jurisdictions' pre-scripted messages for the public accessible to those with access and functional needs?	National Response FIOPS (C-1-2) states that pre scripted informational releases are developed for multiple audiences and/or incidents. The RCPGP Warning System Integration Research Project report (1) finds many warning providers didn't develop pre-scripted messages, despite their "demonstrated benefits"
3	Common	Public Information and Warning	Do the state/territory and all applicable jurisdictions have technologies for communicating public information and warnings to individuals with access and functional needs?	Bay Area Compendium (120) asks about using specialized technologies and methods for communicating warnings to people with access of functional needs or limited English proficiency. National Response FIOPS (C-1-3) identifies this issue as well. See also, Emergency Response for People Who Have Access and Functional Needs: A Guide for First Responders
4	Common	Public Information and Warning	Do the state/territory and all applicable jurisdictions' public information and warning plans provide guidance on how to effectively disseminate alerts and warnings to those populations who are difficult to reach, either because of location or connectivity challenges?	The RCPGP Warning System Integration Research Project (1) reports that some communities still do not comprehensively identify how to reach hard-to-reach populations
5	Common	Public Information and Warning	Do the state/territory and all applicable jurisdictions' public information and warning plans provide guidance on how to effectively disseminate alerts and warnings to those populations with Limited English Proficiency (LEP)?	National Response FIOPS (C-1-3) states that public information and warnings need to be disseminated in formats for individuals with disabilities, LEP populations, and others with access and functional needs
6	Common	Public Information and Warning	Have the state/territory and all applicable jurisdictions established procedures for disseminating public information and warnings to populations with access and functional needs?	National Response FIOP (C-1-3) states that public information and warnings need to be disseminated in formats for individuals with disabilities, LEP populations, and others with access and functional needs
7	Common	Public Information and Warning	Have the state/territory and all applicable jurisdictions translated pre-scripted messages into multiple languages?	National Response FIOP (C-1-2) states that pre scripted informational releases are developed for multiple audiences and/or incidents. The RCPGP Warning System Integration Research Project report (1) finds many warning providers didn't develop pre-scripted messages, despite their "demonstrated benefits"
8	Recovery	Health and Social Services	Do the state/territory and all applicable jurisdictions possess written plans that include an established mechanism for identifying and addressing non-emergency social services and medical needs of survivors, such as medication, home health care, or physical therapy?	Page 6 of the Disaster Behavioral Health Capacity Assessment Tool, HHS, ASPR, July 23, 2014 version
9	Response	Critical Transportation	Do the state/territory and all applicable jurisdictions have access to sufficient specialized equipment, such as buses, vans, etc., to transport people with access and functional needs?	Response FIOP, D-1-13: "Providing critical transportation for individuals with access and functional needs" is listed as a task under the deployment stage
10	Response	Critical Transportation	Do the state's/territory's and all applicable jurisdictions' plans account for the evacuation and transportation requirements of individuals with access and functional needs?	Response FIOP, D-1-13: "Providing critical transportation for individuals with access and functional needs" is listed as a task under the deployment stage
11	Response	Critical Transportation	Have the state/territory and all applicable jurisdictions developed an evacuation plan that pre-identifies high-risk individuals (e.g., the elderly) and outlines an approach for their evacuation?	
12	Response	Public Health and Medical Services	Do the state/territory and all applicable jurisdictions have a plan that identifies procedures for the medical evacuation of patients during an emergency?	ESF #8 identifies patient evacuation as one of the core functional areas for the ESF. It says that this functional area is coordinated with Federal, state, tribal, territorial, and local EMS officials (pg. 5)
13	Response	Public Health and Medical Services	Do the state/territory and all applicable jurisdictions have plans that outline procedures that ensure the access- and functional- needs populations will receive the public health services they need during an incident (i.e. language assistance services, post-incident home health checks) ?	ESF #8 states that services under this core capability cover the needs of the "at risk" or "special needs" population.
