1. Estimates of lifetime need for alcohol treatment based on data from the New Jersey 2003 Household Survey (Appendix D-15 Table 3a). Estimates rely on self-reported symptoms of substance dependence which is chronic. Hence, reports of lifetime rather than past year symptoms are more reliable for estimating treatment need.

2. Estimates of current need for illicit drug treatment based on capture-recapture analysis of data from the Alcohol and Drug Abuse Data System (ADADS) and New Jersey Substance Abuse Monitoring System (NJ-SAMS): 2002 and 2004.
