

New Jersey Human Services has modeled how the specific House-approved proposals will impact Medicaid here in New Jersey:

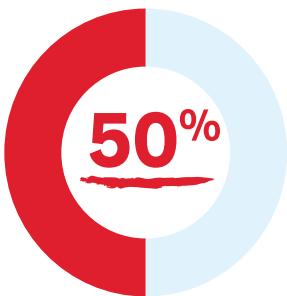

- About 350,000 residents will lose healthcare coverage under the plan—that's 20 percent of those covered today, including half of the Expansion population.
- The House-approved plan would force New Jersey policymakers to make an inhumane and appalling choice between taking fully state-funded healthcare away from 46,890 children by kicking them out of NJ FamilyCare coverage OR making New Jersey pay an approximate \$700 million annual federal penalty that will take money out of the healthcare system
- New Jersey will receive an estimated \$3.6 billion less in annual federal Medicaid funding, including cutting about \$300 million in federal funds for hospitals, at the same time hospital uncompensated care costs for uninsured individuals will soar.

OR

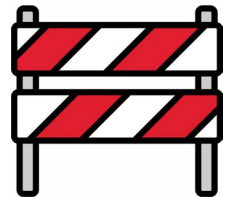

**of enrolled residents are
expected to lose
NJ FamilyCare.**

**Half of Expansion
adults would lose
NJ FamilyCare.**

**The vast majority would still be
eligible, but will face new paperwork
and other bureaucratic hurdles
designed and budgeted
to kick eligible people
off insurance.**

New Jersey would receive an estimated

**\$3.6
BILLION**

**less in annual federal
Medicaid funding than
it currently receives.**
